Co., where I create robust and scalable solutions for various customer problems and needs using Java, microservices, spring-boot, REST, SQL and NON-SQL databases, and test automation frameworks.

Working as a Software Engineer 3 at JPMorgan Chase &

Profile Summary

Java Developer with over 8 years of experience, I have focused on solving customer problems, improving usability, and maximizing efficiency. I specialize in creating microservice-based applications and have extensive experience in design, development, and application maintenance. My skills include product development, technical experimentation, functional design specifications, and cloud computing. I am proficient in Java, microservices, spring-boot, RESTful, SQL and NON-SQL databases, and test automation framework. I have a strong understanding of core Java, collections, design patterns, multi-threading, and Hibernate. I am effective at working in Agile environments using Scrum methodologies and possess good leadership qualities and soft skills like adaptability, communication, ownership, and teamwork.

Oct 2022 - Present

Software Engineer 3

JPMorgan Chase Bank

- Met project deadlines by effectively managing time and prioritizing tasks. Developed reusable components to reduce development effort.
- Optimized algorithms for faster processing.
- Collaborated with cross-functional teams to deliver highquality software products.
- Refactored legacy codebases for improved maintainability.
- Developed robust, scalable, modular and API-centric infrastructures.
- Integrated new technologies into existing systems.
- Provided technical guidance to junior developers.
- Conducted thorough code reviews to enhance code quality.
- Participated in architecture, design and implementation of back-end features. Corrected, modified and upgraded software to improve performance.
- Created proofs of concept for innovative new solutions.

Sep 2019 - Sep 2022

Senior Software Engineer 2

Rakuten

- Trained and mentored junior developers and engineers.
- Worked with software development and testing team members to design and develop robust solutions.
- Reviewed project specifications and designed technology solutions.
- O Updated old code bases to modern development standards.
- Integrated third-party tools and components into applications.
- Tested methodology with writing and execution of test plans.
- Delivered unit-tested systems within customer-prescribed timeframes.
- Introduced best practices agile methodologies and development best practices.
- Improved code quality in terms of JUnit coverage, SonarQube

and automation coverage.

• Managed java technological issues for assigned projects.

Aug 2018 - Sep 2019

Develper 1

Thermofisher Scientific

- Used critical thinking to break down problems and evaluate solutions.
- Developed team communications and information for meetings.
- Worked flexible hours across night, weekend, and holiday shifts.
- Participated in continuous improvement by generating suggestions and engaging in problem-solving activities.
- Created plans and communicated deadlines to complete projects on time.
- Worked with customers to understand needs and provide excellent service.
- O Offered friendly and efficient service to customers.
- Improved code quality in terms of JUnit coverage, SonarQube and automation coverage.

Jan 2016 - Aug 2018

Software Engineer

Capgemini

- Worked with software development and testing team members to design and develop robust solutions.
- Reviewed project specifications and designed technology solutions
- Integrated third-party tools and components into applications.
- Informed internal personnel and external stakeholders of project milestones.
- Identified and documented project changes with proactive budget oversight.
- Improved code quality in terms of JUnit coverage, Sonarqube and automation coverage.
