Meridian IT Inc.– Sr Consultant

Deerfield, Illinois

April 2009 – Sept 2010

Lead following project teams to completion:

Client - DSC Logistics, Des Plaines, IL – WebSphere Portal/WCM Consultant- Feb 2010 to Sep 2010. – Project ended.

- Implemented complete Intranet site from scratch, both server setup and WCM development.
- Setup WebSphere Portal 6.1.5 Delivery and Authoring standalone Production Environment.
- Integrate with LDAP of MSAD forest global catalog.
- Setup DB2 for portal servers. Automated DB2 maintenance and backup tasks.
- Gather intranet site requirements from key business individuals.
- Design the intranet site using WCM layout and site structure.
- Implemented all Web Content Management(WCM) artifacts and Portal/Theme customizations.
- Created portal test environment.
- Daily environment support.

Client - SXC Health Solutions, Lisle, IL – WebSphere Portal/WCM Developer Consultant- April 2009 to Nov 2009.

- Developed complete WCM/Portal SXC's INTERNET site in a very compressed timeframe given, based on WP6.1/WCM6.1.
Site is live and can be accessed at: www.sxc.com
- Next, worked on another SXC's WCM/Portal site for Clients used only. This site is also live now: <http://cic.sxc.com/wps/portal/cic> (requires login).
- Created all WCM artifacts:
 - o Authoring Templates
 - o Presentation Templates
 - o Various Components (menu, navigator, image, file resource, etc ...)
 - o JSP components
 - o Personalization components
 - o Etc ...
- Developed custom integration portlets based on JSR286/REST API using Portlet Factory with Lotus Quickr document library.
- Using Portlet Factory customize portlet which integrates with Siebel e-support services.
- Open PMRs as needed to resolve issues.
- Helped with Portal/Quickr environment setup for Portal/WCM 6.1.
 - o Installed latest fix packs, ifixes and wcm cumulative fixes.
 - o Database transfer
 - o Ldap integration with multiple realms
 - o Ephox editor setup.
 - o WebSphere Portlet Factory Setup.
- Export and import of libraries from development environment to test environment.
- Large amount of Portal Theme and Skin, UI customizations.
- Lotus Quickr Theme and Skin customizations.

Other tasks:

(Meridian IT Inc.)

- Created customized WCM components using WCM API, to help compare libraries after import/export.

- SSO setup between WebSphere Portal and Lotus Quickr.
- Setup Lotus Connections 2.0.1 Environment for all features, each on a separate WebSphere profile. Install and setup multi-profile WAS 6.1.0.13, DB2, TDI, Lotus Connections 2.0.1 software and setup with Domino Directory server. Currently working on Connections 2.5.
- Passed IBM Lotus Connections 2.5 certification exam. Which helped the company with IBM partnership requirements.

Family Business (non-IT) : April 2008 to April 2009

Helping with family business from April 2008 to April 2009.

MOTOROLA (Chicago suburb) - 10 years.

Lead / Sr Engineer

Feb 1998 to April 2008

Worked within different Motorola teams: **Network and Mobile Services.**

- Define new and updated processes for System Test teams.
- Designed, developed and implemented Bid & Quote and RFP/RFQ Portal System for Telecom Network sales team. The system provides services in generating automated proposals and quotes based on customer requirements. This greatly reduces the overall turn-over time and common mistakes for generating proposals and quotes. This is was done using Sharepoint, VB and ASP.
- Provided installation, configuration, setup, troubleshooting, maintenance and upgrade of services in Lab environment.
- Performed duties of System Test Execution Lead, which included coordination of contractors (10+people), training them and assigning them to different tasks of the project. Also, worked on Motorola's High Growth market phones (such as: new 3G Razr2 in 2007).

Education:

B.S. in Computer Engineering. Illinois Institute of Technology - Chicago, IL. Completed in 1998.

Technology Exposure (mostly at intermediate level):

CMS:	AEM 6.5, AEM 6.x, Sling, Models, HTL, JCR, osgi, Components, Templates, DAM(assets), workflows
Portal:	IBM Portal/WCM
Front End:	Angular, React, Enzyme, JavaScript, Material UI, Bootstrap
Back End:	Node.js, Express, Golang, Java, Spring, Spring Boot, Spring Cloud, Netflix stack, Python, C++, C#, C, SQL
Integration:	Spring Integration, IBM MQ, Rabbit MQ, Kafka
Data processing	Python, Pandas, Blockchain
Web Services:	RESTful/API, SOAP, gRPC, Microservices
Web/App Server:	Tomcat, Websphere, Portal/WCM, Adobe Experience Manager AEM 6.x
Databases:	MySQL, MongoDB, MS SQL Server, Oracle

Tools - CI/CD: Jenkins, Docker, Git, GitHub
Platforms/Cloud: AWS, Azure, GCP, PCF
Analytics: Tableau, PowerBI
