CAREER OBJECTIVE

A motivated individual with In-depth knowledge of python, frameworks like Django, and development tools, seeking a position in a growth-oriented company where I can use my skills to the advantage of the company while having the scope to develop my own skills.

PROFESSIONAL SUMMARY

- Around 4 years of professional experience in **Python, Django, HTML, CSS, JSON, and MYSQL.**
- Quick at identifying errors and debugging code.
- Ability to handle multiple tasks and work independently as well as in a team.
- Extensively involved in developing web applications.
- Well-acquainted with the Software Development Life Cycle (**SDLC**).
- Ability to learn quickly and to correctly apply new tools and technology.
- Worked on creation of **REST APIs** with **Django Rest framework.**
- Creating API in Python to Query the data base to reflect required changes in UI.
- Worked with various technologies like **Python Programming Language** and **Django frameworks.**
- Experience in working with **Python and Django ORM Libraries** to fetch data from database to build scalable API.
- Knowledge of designing skills using **Python and advance python (OOPS) concepts.**
- Good knowledge in using tools like **GIT, GitHub, JIRA, Jenkins.**
- Keeping track of the changes in the versioning using **GIT.**
- Responsible for developing Models for the application using **Django Models.**
- Responsible for committing the code to client using **GITHUB.**
- Coordinate and smooth communication with the team to meet the Business requirements.
- Good experience in working with a team together to deliver the best outputs in given time frames.
- Basic Knowledge of **AWS** services **Identity Access Management, Storages, EC2, S3, Pyspark, RDS, Lambda, Redshift, EMR, Cloud Watch.**

EDUCATION

Qualification	Degree	Board\Univ.
Graduation	BCA (Comp)	Nanded University
Post Graduation	MBA (IT)	Pune University

TECHNICAL SKILLS

Operating Systems	Windows
Languages	Python, HTML, CSS
Framework	Django, DRF
Database	MYSQL, SQLITE3
Version Control Tool	GIT(GITHUB)
Tools exposed	Pycharm, Vscode, Jupiter Notebook, Postman, Jira

WORK EXPERIENCE

Working as a **Software Engineer** at **IT Intellect Micro Solutions**. from 20th Jan 20 to till now.

PROJECT DESCRIPTION

Project 3:

Project Name : Dollar General Corporation.

Role : Python Developer

Project Description:

Dollar General Corporation is an American chain of variety stores and it is s one of the largest retail businesses in the country. Its focus on providing customers with low-cost merchandise has made it athriving company, with consistently rising sales and profits over time.

ROLES & RESPONSIBILITIES :

- Attending Daily stand-up meetings (Scrum), Estimation meetings and Requirement reviewmeetings to analyze requirements for each story card in a sprint.
- Used JIRA for Task and defect tracking.
- Creating database schemas for newly generated data.
- I have created Python API's to Query the database and update the tables.
- Sorting the extracted data in Mysql database for further querying and analysis.
- Worked on the creation of REST APIs with Django Rest framework.
- Keeping track of the changes in the versioning using GIT.
- Coordinating with the team to meet the company requirements
- Created code to provide a flexible environment to send the reports as per requirement.

Project 2:

Project Name : GXO Logistics

Role : Python Developer

Project Description:

GXO Logistics, Inc. is an American global contract logistics company that manages outsourced supplychains and warehousing.

ROLES & RESPONSIBILITIES :

- Attending Daily stand-up meetings (Scrum), Estimation meetings and Requirement review meetings to analyze requirements for each story card in a sprint.
- Creating API to query the data base to reflect required changes in UI.
- Creating automatic mechanism to extract the user data.
- Identifying and fixing of bugs/problems in the application.
- Responsible for sharing code on GITHUB.
- Keeping track of the changes in the versioning using GIT.
- I have implemented django forms, templates ,models, authentication, authorizationmechanism.
- Implementing Django Foms,models,Views in django framework

Project 1:

Project Name : Amplify Energy Corp. Oil & Gas

Role : Python Developer

Project Description:

Amplify Energy Corp. is an independent oil and natural gas company engaged in the acquisition, development, exploitation and production of oil and natural gas

ROLES & RESPONSIBILITIES :

- Attending Daily stand-up meetings (Scrum), Estimation meetings and Requirement review meetings to analyze requirements for each story card in a sprint.
 - Implemented Python API's to Query the database and update the tables.
 - Supports existing applications and new applications under development.
 - Test and debug programs and improve functionality of existing systems
 - Knowledge of how to build and use with Restful APIs.
 - Creating API in Python to Query the database to reflect required changes in UI-Responsible for developing Models for application using Django Models.
 - Worked on various Authentication and Authorization Policies Like JWT and Token with DRF Authentication implementations.
 - Displays knowledge of software engineering methodologies, concepts, and skills.
 - Worked on Django serializers, Models, views, URL routing etc. in Django also implemented API View, View set, Generic Views and routers in Django rest framework.
-
