Skills

HTML5,CSS, JavaScript,Bootstrap,Typescript,Angular(5,6,8,13),React Js, Wordpress

Projects

Verizon (April 2022 - September 2023)

- 'Verizon' is US based tele communication network client where the user interface build with Angular and Backend with Java programming
- Used various Angular custom directives and developed reusable components and templates that can be re-used at various places in the application
- Developed application in Angular 6 with Typescript and RXJS for using observable sequence to allow Async data streams without the box RXJS operators.
- Developed the application using Angular 6 framework along with HTML, CSS3, Typescript,Bootstrap.
- Typescript is used for debugging directly in the browser as the mapping files are created during build time.
- Worked with test engineering team (QA) to assure product quality.
- Implemented NGRX store to maintain the state of application.
- Extensively worked on CSS Background, CSS Positioning, CSS Text, CSS Margin..etc for the rich user interface.
- Used Jira to keep track of Bugs to reduce downtime and increase in productivity and communication
- Made the application responsive with the help of bootstrap and CSS properties.
- Following the code coverage as well in the application
- Involved in production calls and will be responding to the issues need to be fix as part of Deployment
- Currently working on the Angular 13 version application issues where the functionalities and alignments issues need to be fixed.
- Responsible for Style, look and feel of the web page with CSS dynamic behavior such as functions, operations.
- Worked on React.js Virtual Dom and React Views, rendering using components which contains additional components called custom HTML Tags.
- Implemented various screens for the front end using React.js and used various predefined components from Node Package Manager and redux library.
- Worked on React.js components, Forms, Event, Keys, Router, Material UI like React icons, Ionicons and Flux concepts

WPMS (WEB PRODUCTION MANAGEMENT SYSTEM) (Aug 2019 - Feb 2022)

- WPMS is an Asp.Net based application which provides the backend data from the server .
- Worked as a Front-End Developer in the 'WPMS' project . Redesigned the application by using bootstrap and carbon design.
- Created some external properties and classes which is required as per the design of the application.
- Modified UI as per the design requirement in Asp.Net tags which used in the application and added CSS files as per the design requirement Created new Dynamic menu item by using Asp.Net and front end frameworks.
- Designed the application wireframe from sketch and wordpress by using plugins to showcase the new design from our end.
- Used Jira to keep track of Bugs to reduce downtime and increase in productivity and communication.

PEPSICO FRITO-LAY (Feb 2019 - Aug 2019)

- PEPSICO FRITO-LAY is a salesforce project that described the end to end data of the products (from manufacturing to distribution).
- Worked as a Salesforce front-end developer in "PEPSICO FRITO-LAY" project.
- Created the Components in the lightning as per the design requirement.
- Modified UI as per design requirement in lightning and changed the SCSS files into SASS.
- Modified the data by using Aura framework as per the requirement.

DHL -User training module (Dec 2018 - Feb 2019)

- DHL - User Training Module is based on Wordpress Theme which can be done by using the plugins for the rich user interface.
- Created Training Modules as per the client requirement. Created the rich user interface by using Elementor plugin. -Created various modules by using Learndash plugin. -Integrated the script as per the requirement(eg: created one small set of Q&A for the application which can be used as a Quiz).
- Created modules for the users such that the user can select the module as per their requirement and complete the module by taking quiz.
- Created login page where the user can register or login with their Id's.

Vodafone (Aug 2018 - Dec 2018)

- "Vodafone" is a web based responsive application that allows to create multiple screens and views by using angular5 and other frontend frameworks.
- Developed the application with the help of Typescript where we can debug the errors in browser and for running the application.
- Used NPM for installing required node modules and other published NPM modules.
- Installed the bootstrap framework for best user end interface.
- Created components and integrated with the data as per the requirement.
- Updated the application with new features of Angular 5. -Extensively worked on CSS Background, CSS Positioning, CSS Text, CSS Margin..etc for the rich user interface.
- Used Jira to keep track of Bugs to reduce downtime and increase in productivity and communication.

DHL (May 2018 - Aug 2018)

- "DHL" is a Responsive microsite that creates static data for the appearance of website depending on the screen size and orientation of the device being used to view it.
- Created a Responsive web design by using HTML5, CSS3, JAVASCRIPT and BOOTSTRAP3.
- Used CSS and JQuery for rich user interface.
- Interacted with clients to understand their existing applications and design the site according to their system requirements.
