Professional Experience

Lead Software Engineer - Mobile & Web,
ARInspect Software Pvt Ltd ↗

11/2019 – 06/2023 | Ahmedabad, India

I was a part of ARInspect, a platform that automates field operations and is highly regarded by US Government agencies. I started as the Technical Lead for Android and led a team of five Mobile Engineers. In May 2022, I was promoted to Engineering Head and took charge of ten Frontend Engineers, seven Backend Engineers, five QA Engineers, and two Automation Engineers. My responsibilities included planning, designing, developing, and launching new product features using an agile methodology. I supervised a team and ensured that everything was running smoothly.
