## **PROJECT**

**Title:** Audience Behavior Mining : Integrating TV Ratings with Multimedia content

**Description** : TV ratings are a widely used indicators in the TV broadcasting field. While TV ratings are mainly used in advertising, they can also be used as a social sensor that reflects the interests of the people. Used along with other multimedia contents such as video and text, it enables various types of knowledge to be semi-automatically found, such as what types of news programs are of most interest and what are the key visual features for acquiring high TV ratings

**TOOLS** : Windows95/98/2000/XP/7

**Duration** : December 2018 to March 2019
