#504/3F, Kul Ecoloch Phase 1

Balewadi-Nande Road, Off Balewadi

Stadium, Mahalunge, Pune,

Maharashtra, 411045

I am looking for opportunities to work for an organization which provides challenging work and gives a position where my leadership, strategic planning & customer interfacing skills can be used to forge a strong relationship.

I Amit Kishore, have 17+ Years of experience, currently working with CapGemini India. I am working as Technical Delivery Manager and have played various role like Sr. Solution Architect/ Technical Program Manager / Sr. Business Analyst/ System Integration Manager/ ServiceNow SME so far. Expert is providing ServiceNow services, Consulting, Pre-Sales, Product innovation, Quality Delivery Experience in Cloud based Application development platforms. Help Customers to achieve Business Transformation(BTD), Service Operation & Automation. Handling multiple clients at difference geographical locations. Expert in SACM and designed most complex integration like JAMF, SCCM, Lansweeper, RNT etc with ServiceNow. Currently I am looking after projects on ServiceNow **ITSM /ITAM & integration**.

Experience of implementation of best practices where ITSM tools technologies are applicable with deep knowledge of Agile Methodology. I have 4 years of experience in Enterprise search (HP Autonomy **IDOL**) as an architect along with 5+ years of experience in Project management.

QUALIFICATIONS: -

B.Tech (Mechanical Engineering) from VTU during 2001 - 2005 with 66.63%.

Diploma in Advance Computing (DAC) From IACSD PUNE during (Feb - Aug) 2006.

CERTIFICATION :

- ServiceNow, Certified System Admin (CSA)
- ServiceNow, Implementation (CIS-ITSM)
- Certified in ServiceNow ITSM suites.
- Software Asset Management (CIS-SAM)
- Hardware Asset Management(CIS-HAM)
- Performance Analytics
- Certified in ITIL foundation.
- Certified Scrum Master and Product Owner.

WORK SUMMARY:

- Played various role like Technical Programme Manager/ Sr. Solution Architect/ Integration Manager /ServiceNow SME/Sr. Business Analyst to onboard client on Service Now.

Key Activities :

- Work collaboratively with Engagement Manager to monitor for scope creep and resolve technical issues and challenges.
- Provide mentorship and guidance to other members of the team Developers, Technical Consultants, and other Solution Architects in relation to technical design standards and implementation of best practices.
- Identify the current needs, demand from the business community, and understand systems feasibilities to cater those needs and implement robust solutions in the system to address gaps.
- As a part of Service Design and Service Transition, I am responsible for defining technical evaluation criteria for product and technology selection and determining technical approaches to ensure all architectural solutions result in a coherent systems design.
- Assist the Pre-Sales team with scoping service engagements typically involving multiple ServiceNow products and complex integrations with client applications/systems.
- Support the sales effort scoping and estimation that refine the customer vision and capabilities into activities and estimates.

- Serve as primary technical point-of-contact for projects and as the face of the development team to the customer, Demo and POC to the customer.
 - Plan, distribute and drive projects with developers in an Agile model. Document best practices for design and development and ensure development team(s) are following them
 - Manage relationships with our business partners and stakeholders. Drive technical conversations with vendors and technical stakeholders.
 - Define, at an architectural and design level of detail, technical solutions aligned with our client's business problems and ServiceNow Implementation Best Practices
 - Understand customer requirements, translate to solutions, and communicate to clients.
 - Write/estimate Stories, monitor Developer's work, and own overall quality and delivery of development.
 - Responsible for Sprint demos and delivery of additional development artifacts, documentation, and knowledge transfer activities.
 - Excellent communication skills at all levels including senior leadership processes Drive improvements that help us to scale through optimization and automation of manual.
 - Contribute to the continual improvement of Delivery Services processes as well as the maturing of the different portfolios, capabilities, expertise, and best practices in consideration of customer needs and requirements.
 - Work with clients and ServiceNow teams to establish delivery operating model governance to ensure successful go-lives, end-user adoption and on-going support.
- **Technical involvement:**
- Worked on complex ITSM modules IM, PM,CM,KM, PA, CMDB & Service Catalogue.
 - Build Foundation data Template and CI data load.
 - Developed technical documentation.
 - Coaches and trains Service Now stakeholders.
 - Cloning, platform update and upgrade.
 - ServiceNow Platform design, including considerations for integration and performance aligned to ServiceNow best practices.
 - Perform upgrades and customizations of ServiceNow platform applications-based architects, ITIL practice.
 - Experience with key technologies relevant to the ServiceNow integration solutions including: SSO, SAML, Web Services, LDAP, JDBC, REST/SOAP
 - Assesses instance health by conducting ServiceNow Health Scan
 - User provisioning with Microsoft Azure AD
 - Orchestration Software provisioning using SCCM integration in service now.
 - Configuration Okta with service now for SSO and User Provisioning
 - Configure LDAP and mid server for User and Group Provisioning.
 - Good knowledge of the core backend structure for Service Now: Scripting, Business Rules, Client Scripts, Script Includes, UI Actions, UI Policies, ACLs, Flow Designer & Workflows, Notifications, Scheduled Jobs, SLAs, Approvals, Assignment Rules, inbound email actions.
 - Experience in Integration (REST and SOAP)
 - Experience in develop integration using various type of systems directly or through mid-server
 - Good understanding of ServiceNow eco-system & working knowledge across multiple products such as ITSM, ITAM, ATF, Performance Analytics etc.
 - Implemented Software and Hardware Asset management :
 - Managed software models, entitlements, and allocation in SAM.
 - Build software contracts and relate them to entitlements.
 - Imported software inventory.
 - Optimization and reconciliation
 - Normalization and Removal candite
 - Maintain the organization software compliant with the help of or SAM Pro
 - Report and dashboard
 - Licensing consultation, Compliant management. Harvesting, ServiceNow Implementation an operation
 - Managed hardware models and Stockroom in HAM.
 - Asset onboarding, Refreshment planning, Disposal, CDMB & IRE
 - Hardware Asset Dashboard and Asset lifecycle automation
 - Enable service content set-up (by opt-in) to optimise the normalization for in-house/home grown asset.
 - Focus on trustworthy data to maintain the quality from audit perspective.
- Worked as **Technical Project Manager**
- Starting from SOW sign off, Kick off meetings, Schedule baseline, resource engagement
 - Conduct Procurement and order processing, etc. based on bill of material in SOW.
 - Drive and prepare Project plan as per SOW terms and Estimation along with stakeholder sign off on documents.

- Identify, record, and manage project risks and issues. Establish the metrics and parameters.
 - Create clear and attainable project objectives, build project requirements, and manage the constraints of the project including but not limited to: cost, scope, schedule, and quality.
 - Establish and conduct weekly/monthly status meetings.
 - Routinely communicate project results to the Program Manager, Business, and IT Partners.
 - Investigate project developments, validate assumptions, upcoming deliverables, and resolve conflicts.
 - Once execution is complete, arrange for Project acceptance from customer followed by billing and feedback
 - Capability to handle & lead all phases of implementation–requirement, perform various project activities from Project Initiating, Planning, executing, monitoring and controlling and project closure.
 - Excellent communication skills with Effective stakeholder management - Liaising with business users, project management, designers, test manager, system operators, change management, production planning and implementation team at various stages of Project Management Life Cycle.
- **Worked as System Integrator for UK site applications.** I was responsible to bringing together all the various components of Build-Test-Deploy phase with the help of different service providers i.e. HCL, CTS & Infosys.
- **4 years of experience in distributed IDOL architecture implementation with Autonomy IDOL Server 10.x.x, DiSH/DIH/DAH, Eduction, Proxy, Connectors.**
- Experience with connectors including File system, HTTP, ODBC, Documentum & experience with CFS connector configuration, LUA scripting, index and search optimization.
 - Effective collaboration and communication with the stakeholders and business users to ensure client satisfaction.
 - Handling support of whole architecture from the indexing of documents through various connectors/fetches, DIH, DAH to IDOL content with education module (Index task), including request for up-gradation or any changes.
 - Involved in the architecture and design phase of the enterprise search and taxonomy containing more than 40 billion documents successfully indexed.
 - Experience on 'Go Live' activities as per the Implementation plan to enable productionization of application without any issues.
- 2+ years of experience of IBM mainframe development/enhancement.

DETAILS OF THE PROJECTS WORKED ON

Capgemini India (Nov'20 – Till date)

<p>Canadian Bank/Pharma company: Jul'22– till date. Sr. Solution architect Project: - Service Now Onboarding.
