EDUCATION

**Electronics &
Telecommunication
Engineering**

**Savitribai Phule Pune
University**

Jul 2007 - Apr 2012

TECHNOLOGIES

- **Programming:** JavaScript, ECMAScript (ES), Vanilla JavaScript
- **Markup / Style Sheet & Tools:** HTML 5, CSS 3, Sass, Babel, Webpack, NPM
- **Front End Libraries / Frameworks:** React JS, Redux, Bootstrap, Material-UI
- **Testing Frameworks:** Jest, Testing Library - React
- **Others:** RESTful APIs, JSON, JSON Web Token(JWT), Agile/Scrum, Git, GitHub

EMPLOYMENT

SENIOR SOFTWARE

ENGINEER

TIETOEVRY INDIA

JUN 2019 - MAR 2020

Energy Components (EC) Product - (June 2019 to March 2020)

- EC - A product dealing with Oil & Gas production built to track activities of Oil & Gas from production till the sales
- Utilized React for its efficient data flow architecture to create a lightweight and render efficient web application
- Worked in using React JS components, Forms, Events, Keys, Router and Flux concept.
- Revamped & Developed UI application interface for customer-facing product with considerable number of unique features in an agile environment & identified and troubleshot application code-related issues
- Involved in writing application level code to interact with APIs, web services using JSON
- Fixed UAT defects for the project & released product versions as per client requirements working as an individual contributor. Created technical design documents & wrote unit test cases
- **Project Technology Stack:** HTML 5, CSS 3, JavaScript, React JS, Redux, RESTful APIs, Jest, Testing Library - React

ASSOCIATE

COGNIZANT INDIA

AUG 2012 - MAY 2019

Advanced Fraud Early Warning Services (AFEWS) - (March 2018 to May 2019)

- AFEWS - A third-party system which had rules configured to identify unusual transaction done by user
- Responsible for development and maintenance of reusable React JS components
- Architected frontend, created reducers, data retrieval mechanisms. Optimized the application performance to meet business objectives. Responsible for

- state management (Redux based) of the application for customers
- Implemented flux pattern by using redux framework as a core dependency. Maintained states in the stores and dispatched the actions using redux
- Experienced in React JS and working with React Flux architecture. Experienced in RESTful web services to integrate between server side to client side
- Implemented enhancements that improved web functionality & responsiveness and identified ways to improve design and development
- Participated in code reviews and ensured that all solutions are aligned to predefined design specifications
- **Project Technology Stack:** HTML 5, CSS 3, JavaScript, React JS, Redux, RESTful APIs

Global Dispute Processing (GDP) - (January 2017 to February 2018)

- GDP - User was enabled to raise dispute in the system. The dispute reasons included product not received, product unacceptable, duplicate, etc.
- Translated design team's UX wire-frames and mock-ups into responsive, interactive features, using HTML, CSS and JavaScript
- Used media queries for the design to be compatible in all devices.
- Worked effectively within collaborative team to identify and resolve issues. Designed and developed UI for applications and modules using JavaScript
- Co-ordinated with on-site team to understand the requirements and resolve queries
- Developed the code from scratch, resolved UAT defects & coordinated deployment till production
- **Project Technology Stack:** HTML 5, CSS 3, JavaScript, Bootstrap, React JS

ADDITIONAL PROFESSIONAL SKILLS

- Enthusiastic in programming and solving real world computational problems
- Strong problem-solving and coding skills
- Enthusiastic in learning new technologies, languages & frameworks
- Demonstrated ability to work under pressure to meet the deadlines
