Dedicated and efficient full stack developer with 8+ years' experience in application layers, presentation layers, and databases. Experienced in both F/E and B/E technologies. Seeking to further work on cloud technologies as the future full stack developer along with aspiration to transition in AI/ML and analytics.

WORK EXPERIENCE

Senior Analyst
Fiserv India   ● Pune, India

Present- Aug 2019

Abiliti: Next-Gen Access Manager *(Full Stack Developer)*

Access Manager is a back-office application to onboard Retail Users and Corporate Clients into system touching multiple cores and service other configuration management system for Abiliti clients.

- Energized web presence for SaaS startup delivering concept to completion application UX redesign of Access Manager
- Worked in agile dev team on UI development using **ReactJS** for Next Gen UX transformation with new express flows introduced to onboard Consumer and Corporate business clients, account onboarding etc. Worked on creating ReactJS based **micro UI's** for Abilti integration proving configuration mgmt. Services into ROBO applications.
- Back-end development using .NET Core based API's to provide integration with Core services and deployed these to cloud using **PCF config server**
- Worked on **DevSecOps** items for security like **Fortify**, Web Inspect & Sonatype, inducted them in our CI pipelines thus optimising our app Security aspects.

January 2015 – February 2019

Fiserv India   ● Pune, India

Engage – Account Opening / Teller *(Full Stack Developer)*

Engage is a personalized toolset that unifies customer and account information, business processes and decision-making into a centralized view across multiple channels/cores. It provides bankers with the information and capabilities they need to deliver an unparalleled level of service to their customers.

- Worked in agile dev team on API and REST based WCF services implementation with SQL as database and integration to Core via ESF services.
- UX development using Angular JS on Account Opening module.
- Web services third party integration for eFunds and Onboard Advisor's back ground verification.
- Wolters Kluwer's form integration for Account Opening e-docs and archrivals.

Senior Software Engineer
Fiserv India   ● Pune, India
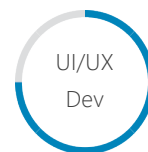

June 2012 – Dec 2014

Bank-Link *(Backend Developer)*

Its end user retail online banking application for account processing services, with unified integrations with ACH, Wires and POSPAY.

- Worked on enhancement for single sign on for MFA. Support the release cycles and production PAS case tickets.
- Cleared defect backlog for the product to a significant level.
- Worked on penetration testing security issues for XSS and overly broad session cookie in their legacy parent child-based architecture.

SKILLS

UI/UX Dev
