

Dhana Subramaniam

Professional Summary

An engineering architect who excels in building highly reliable, scalable and distributed software platforms. A mentor and a coach who is committed towards the technical and professional development of his team members. **15** years of management experience on Java/J2EE software development and salesforce.com (Cloud Computing) development with open-source technologies.

Work History

I am in India now, looking for job in India.

Groupon – Salesforce Architect

Chicago, IL (04/2016 – Current)

Chennai, TamilNadu, India (07/2013 – 03/2016)

- Managing Groupon's Deal Supply Chain development teams which develop and maintain tooling for our internal users to manage deal content, life cycle, and distribution across multiple internal services.
- Work with other micro services team to define integration strategy for the applications that I own.
- Designed coding standards and methodologies for Java, APEX, Trigger, Visualforce coding and Lightning Platform.
- Designed and Implemented best practices for Salesforce Lightning UI
- Designed solution for deploying metadata components and legacy services integration to Salesforce using MuleSoft as Middleware
- Designing, architecting, and building Groupon's first dedicated deal management platform bridging the entire deal lifecycle from lead gen to post close. This system represented an early move away from a monolithic architecture toward something more service oriented.
- Lead efficient sprints through sprint planning, stands and retrospectives to ship deliverables within promised timelines.
- Maintain high quality of all software services supported by the team by working closely with Quality Assurance engineers. Maintain the health and operational readiness of services to receive high traffic at all times through Grapher/Wavefront dashboards, Splunk queries and Load tests.
