ORACLE PL/SQL DEVELOPER

Application Development ● Service Delivery
Domain expertise entails Banking Application

PROFILE SUMMARY

- A result-oriented professional with around **4 years** of experience in PL/SQL application development & enhancement, service delivery in Banking domain
- Insightful knowledge of Oracle PLSQL Development in Analysis, Design and Implementation of Business Applications using the Oracle Relational Database Management System (RDBMS).

EMPLOYMENT DETAILS

Sep' 17 – Till Date with Accenture Pvt Ltd, Bangalore
Client: UBS Group AG (Swiss Multinational Bank)
Involved in enhancing and supporting HRIT banking applications and Delivering vendor-based applications

Key Result Areas:

- Worked on an Oracle Fusion Application for accessing the data and providing interfaces for downstream applications developed for business requirements.
- Used PLSQL to build complex SQL Queries, tables and views using Joins, Sub Queries and Set Operators for downstream data analyzing.
- Developed Complex database objects like Stored Procedures, Functions, Packages and Triggers using PLSQL
- Have hands on DML commands for cleansing the database by identifying legacy tables, views and roles.
- Performed Impact Analysis for Oracle quarterly upgrades and monthly patches using Informatica Power Center mappings and generate reports for database components.
- Monitor jobs using Autosys Scheduler and to troubleshoot if any failure or long running of the jobs using Unix commands and shell scripting
- Delivered an end to end project by building APAC Payroll Interface by writing SQL and use that in Informatica Source Qualifiers.
- Used TOAD for creating materialized views to overcome performance issues and provide the refreshed data on daily basis.
- Currently working on database migration from Oracle 11g to Oracle 18c and infrastructure migration from Oracle ODA to LENOVO based Hardware.
- Working on setting up LOA2 authentication for post migration activities from Oracle 11g to Oracle 18c.
- As part of database migration project- got hands on experience on troubleshooting various long running queries by looking into Explain Plan etc.
- Also came across various new features introduced in 18c like bequeath definer, adaptive plan, statistics feedback etc.
- As part of innovation contest, have automated repetitive tasks like performing impact analysis for monthly patches and quarterly upgrades which resulted in avoiding human prone errors, provides faster results adding value to business.
- Experience in tools like SVN, GitHub, GitLab Version Control tools and etc.

TECHNICAL SKILLS

Languages
- SQL, PL/SQL and C/C++,

Software & Technologies

Development Tools:	Toad, SQL Developer, Informatica Power Center
Database:	Oracle 11g, Oracle 18c
Applications:	Fusion, Golden Gate
Bug Tracking Tools:	JIRA, ALM and Quality Center
Operating Systems:	Windows and Linux
Ticketing Tools:	Service Now
Job monitoring:	Autosys Scheduler

Version Control System Tool: GIT
Continuous Integration Tool: UBS deploy

ROLE & RESPONSIBILITIES @ ACCENTURE

- Work with business stakeholders to provide solutions addressing business data requirements.
- Work with application developers and business analysts to determine new and changed requirements and provide database solutions accordingly.
- Design, implement and support solution using Oracle 11g.
- Develop SQL scripts, including queries, views, stored procedures to extend existing product with feature enhancements
