Professional Experience

Project:1

Project Name	: Need for Speed the Run
Industry and Business of Client	: Application Testing
Duration	: May2015toApr 2017
Tools	: Java, J2ME, Blackberry/RIM
Role	: Test Engineer
TeamSize	: 10

Description:

It's called The Run. An illicit, high-stakes race across the country. The only way to get your life back is to be the first from San Francisco to New York. No speed limits. No rules. No allies. All you have are your driving skills and sheer determination as you battle hundreds of the world's most notorious drivers on the country's most dangerous roads.

Responsibilities:

- Preparation of Test scenarios to cover entire PEGA testing & ETL Testing.
- Making sure that the JAD, MANIFEST, JAR, COD files follow specific rules or requirements specified by the operator.
- Checking for package installation and un-installation.
- Perform CRC Testing (Legal requirements, Functional Testing, Game Play, Graphical testing, interrupt testing and GSM & Standard testing).
- Performed MGC Testing(1.0,1.5,1.5.5and1.6)depending on specific checklist.
- Test application localization in five international languages (English, French, Italian, German, and Spanish).
- Perform Tier Testing on release of base devices.
- Written the test cases for CRC, MGC and TTR checklists.
- Writing the required SQL Queries to verify the data from file to CDH Applications.
