## PROJECT:

Xyram-Tool:-

- This project is our own product developed for the company.
- In this application, developers can raise a ticket of their issues, so that infra team will fix the issues.
- Also developers can fill their project working hours so that their manager can approve or reject their project. They can view all the team members projects in this app.
- All Hr also can schedule their calls and interviews in this application, So that

Management can track their performance.

- Likewise different modules are developed for the company usage.

#### E-COMMERCE:-

- This project is based on online product sale.
- It provides user to order products in online by seeing categories in the app.
- It contains Electronic gadgets and dresses. User can order by both cash on delivery or Pay by card.
- Used Retrofit for Parsing JSON Data.
- Used payment gateway for both KUWAIT and INDIAN Payment.
- Used Language Translation both English and Arabic language.
- Did Google Sign in Integration .

#### BOOM MALL:- (UPLOADED ON PLAYSTORE)

- This project is also based on online product sale.
- It provides user to order products in online by seeing categories in the app.
- It contains dresses. User can order by both cash on delivery or Pay by card.
- Created Merchant side for seeing the order details.
- Used both retrofit and volley for this project.
- Used Payment gateway and language translation for both Kuwait and for Indian payment.
- Used Google sign-In Integration.

#### MYOITC :-

- Developed an android application for myoitccare management which is based on hospitalized management system (Client Side Project).
- These Projects have six portals for employee, employer, Manager, supervisor, provider, and Client.
- Every Portals have Task management, timesheet, Absent Tracker, Employee Folder, current location of client, Request List, Travel Map.
- Used Google Map Integration – Polyline (For client's current location to destination).
- Added Signature Bitmap when client checkout from the location.

e

#### SALON :-

- This project helps the user to find the near by salon shops listings.
- The user can get the appointments for a particular date and can add the favorite salon shop in the favorite list.
- And user can get the direction from current location to salon shop through Google map.

#### MOTIVATIONAL APP:-

- This application is based on list of motivational quotes using Firestore.
- The data stored, retrieved and managed in firestore.
- User can select their related topics and view their favorite quotes in this app.
