PROJECTS

Employee Leave Management System | 6 Month(s)

- Employee Leave Management System (ELMS) is a webpage designed by HTML and CSS and for backend we have used SQL for Middleware we used FLASK framework and PYTHON programming. ELMS helps the management of an organisation by adding and removing employee details and they can have control over the employee leaves and they can add updates like holidays and important updates in page and work calendar. ELMS helps the employees by applying leaves virtually and manage their leaves and know the any important information about the organisation.
