

Java Professional

VIJAY BHASKAR CHINTA

☎ : 8919429536

✉ : vijaylucky02@gmail.com

PROFESSIONAL SUMMARY:

5 years of experience in web application development. Involved in requirement analysis, development, unit testing and system testing.

- Expertise in enterprise web applications development using **Java, J2EE** technologies
- Experience in developing enterprise applications using web technologies like JSP, Servlets, JDBC and distributed computing using Java **Web Services** and Hibernate.
- Sound knowledge and experience in Spring [**Core, MVC, JDBC, AOP**].
- Experience in working with **Spring MVC** in developing web based applications.
- Experience in implementation of creational design patterns like **Singleton, Factory and Factory Method, Abstract Factory, Strategy**.
- Having experience in persistence layer implementation using **hibernate**.
- Experience in application configuration and build using **Maven**
- Experience in test driven development using **Junit**.
- Experience in application deployment on **Apache Tomcat, JBoss**.

WORK EXPERIENCE:

Working as Consultant Development in Infogain India pvt Ltd from May 2021 to September 2022.

- Working as Software Engineer in Sequel Soft Pvt Ltd..from November 2017 to May 2021

EDUCATION:

- BTech (2012-2016) from Annamacharya Institute of Technology and Sciences , Rajampet.

TECHNICAL SKILLS:

Languages	Java
JEE Technologies	JSP, Servlets
Web Technologies	XML, XSD, HTML, CSS
Frameworks	Spring (Core, JDBC, AOP, Transactions, MVC), Hibernate, Java Collections, Junit and Log4J
Web/Application Server	Tomcat, JBOSS
Databases	Sql Server

Java Professional

Java IDE	Eclipse, STS
Operating Systems	Windows
Build Tools	Maven and Ant
Version Control	Subversion(SVN)

PROJECT PROFILE:

Project #1

ProjectName : EJobHire
Role : SoftwareDeveloper
Team Size : 6
Environment : Spring Mvc, SpringAop, SpringJDBC, Spring Transaction, Hibernate, Java, Servlet, JSP, HTML, Oracle 10g
IDE : ECLIPSE, STS
Tools : Svn, Ant, Log4j, JUnit

Project Description:

EJobHire is a web based project like Naukri.com, Monsterindia.com. and I think each and every one aware of that project. It will also work as a job based portal. In which job seeker and Employer will register ourself. And will get a good chance of employment regarding the profile. and provide the functionality of on line chat server for jobseekers.

EJobHire is a basically job based portal and provide the functionality of searching job in each and every field like telecom sector, it filed, marketing, Bpo etc. and provide the functionality of very fast searching the job. Because it will be easily accessible and very helpful for every person.

Roles & Contribution:

- Understanding the Specification Requirements.
- Implementing Validations.
- Involved in development of Business logic and Responsible for Bug fixings.
- Involved in generating the spring beans and configuring the spring beans into spring bean configuration file.
- Involved in writing the code for DAO's using Hibernate.
- Involved in Unit Testing.
- Using the Version control tool for code backup
- Written the Presentation Layer some times.
- Coordinate with the team for instant support tickets.
- Written the XSD.

Java Professional

Project #2

Project Name : HMService
Role : Software Developer.
Environment : Core Java, Jsp, Spring, Hibernate, HTML, CSS, XML, Oracle 10g, Tomcat, Eclipse IDE ,MAVEN.
Team Size : 10

Project Description:

- Health disease management services are utilized by various commercial insurers as well as government agencies to improve their patient's health and outcomes - and thereby reducing the patient's hospitalization and medication claims.
- Health is leading provider of Disease Management Systems. This application works by entering a study group of patients into the database and tracking a variety of data points including general health as well as specific data pertaining to their disease.
- These data points are captured over many years. By analyzing this data, Health Management is able to more accurately predict a patient's likelihood of recurrence, re-admission to a hospital etc.
- These events would be costly to the insurance provider.
- The cost to Health Management in reducing the possibility of future poor health is offset many times over by reducing the possibility of an expensive hospital visit.
- Health Management is a leading provider of disease management and support programs to chronically ill patients, physicians, health plans, and employers.
- Health provides chronically ill patients and physicians with the disease management services and support they need to maintain better health and a higher quality of life.

Roles & Contribution:

- Participated in writing model layer bean classes and validating values from view layer.
- Implemented the Spring MVC with hibernate as persistence.
- Used spring features like dependency injection.
- Implemented Spring MVC with annotations using for all controller.
- Implemented web-service(restful) business method to exchange inter-application information.
- Creating procedure and function for code reusability.
- Implemented the design patterns like singleton, factory pattern.
- Use Version controls like SVN.
