INTERNSHIP & PROJECT

PROJECT
FOOD ORDERING WEBSITE
This project is basically a website for food ordering. Besides a user can also use this site for searching a restaurant along with a brief description of the restaurant and can reserve tables.

PROJECT
FACE RECOGNITION IN HETEROGENEOUS ENVIRONMENT
This project is mainly based on Artificial Intelligence and Machine Learning. A user can use this project to search and recognise a blurred or unclear image and get the results and the person's details.

PROJECT
MOVIE SEARCHING SITE

A website where a user can search for their favourite movies. A user can also login or create a new account in order to save the movie to their favourite list. We also had a recommendation section in it. We used mongo db to store the users details. We also used various api, some were external api and some api were build such as authentication api, fav api, etc, and we used external api to fetch the searched movie.
