Bengaluru, Karnataka

Total 4.8 years of experience in various aspects of automation process developments using Lowcode BPM and RPA automation tools.

I have a total of 2 year of IT experience in rapid application development using low code platforms like OutSystems and 2+ years of experience in working on multiple Blueprism projects. I have expertise in working both in Agile as well as Waterfall methodologies.

EXPERIENCE

Ericsson Global India Private Limited, Bengaluru

May 2019-Present

Automation Developer

- Experience in **OutSystems** RAD platform (.Net), RPA Tool **Blueprism**, **SQL Server**.
- Hands-on Knowledge of .Net, HTML, CSS, and BASIC Java.
- Worked on multiple application development using OutSystems tool which includes usage of OutSystems Service Studio multiple components for frontend UI development, Integration Studio for fetching data from external server using .Net code integration, multiple SQL queries for fetching advance data and calculations, Service Actions, Server Actions, Rest & SOAP Web APIs, Timers, etc.
- Delivered multiple Blueprism projects end to end working as a Senior Developer within the team. Worked on Browser-based, Excel, SAP, Mainframe, Email, Surface automation, etc.
- Good knowledge of Agile as well as Waterfall methodology.
- **Single-handedly derived and delivered projects** with the client and OutSystems Core Team. Also, worked on short-term customer schedules, in both planning and executing the technical activity.
- Excellent communication skills, good exposure in all phases of software engineering starting from requirement gathering to delivery.
- Played a **significant role in scaling up team skills** and efficiency by mentoring, guiding, and training people.
- Active **Member of Technical Interview Panel** and **Audit team** in Ericsson.

Tata Consultancy Services, Bengaluru

August 2016-April 2019

Blueprism Developer

- Developer for automation solutions for the clients on different platforms Blueprism provides.
- Familiar with Blueprism Configurations, Database, its usage, and corresponding environment.
- Experience in **extensive use of Splunk** to handle Blueprism Transaction Data,
- Worked closely with the client management and the business to provide automation solutions and acquire in the projects.
- Hands-on experience of usage of **agile tools like Jira and Assyst** as well as Confluence for the deployments, effort tracking, and knowledge database respectively.

Major Projects

OutSystems Projects:

✓ IBP Short Term Planning-Predictable Material Capability

- Overview- In this project, developed a Frontend UI for handling a large amount of business material data from multiple sources and calculating Shortage/No Shortage for each material based on business logic. End-users could apply multiple filters and time ranges to view material info as well as their shortages in the future.
Machine learning algorithms were also used to predict Shortages for materials in the future.
- This project simplified the enormous amount of data what business has to handle through different Excel sheets. Also, the automation that I did in the project for auto calculating the material shortage in future played a significant role in handling in and out quantity for them. Received **Star Performer of the Quarter Award** for delivering this project with a good efficiency and before expected timeline.

BluePrism Project:

✓ Invoicing Transformation Process (ROBIN)

- Overview-This RPA Automation solution includes end-to-end automation for Invoicing process to Business. The business flow is divided into 4 sub-processes:
 1. Site Handler Reporting
 2. PO Upload from Mailbox
 3. Invoicing
 4. SO creationThis one was a Multi BOT Architecture process that was designed to run on 4 BOTs simultaneously. It includes multiple kinds of automation like SAP, JAVA, Excel, Browser-based, Email, etc. Extensive usage of Queues, spying elements, SAP scripting, .net code usage, and reporting to business through automated emails was included.
- After going live, the BOTs reduced a significant manual effort and time. Before the BOT implementation, there was a team of 18-20 people who used to handle all the hectic tasks. Now 2 people are required for handling the input data. BOTs are running with good success rate in production and saving a lot of time. Received **Power Award** for handling the leading the project end to end and delivering it on time with a good success rate.

Achievements

Have received various appreciations, recognitions, and awards like **Star Performer of Quarter, Star Performer for OutSystems and BP, twice I received Power Award** from clients and organization.

EDUCATION

JSS Academy of Technical Education, Noida (2012-2016)

B. Tech in Mechanical Engineering: 75.6%

Theosophical Inter College, Etawah (2011)

CBSE: 91 %

Theosophical Inter College, Etawah (2009)

CBSE: 87 %

SKILLS

- **Software Tools:** OutSystems, BluePrism, Appian, UiPath
- **Databases:** SQL, SQL SERVER, Azure Databricks
- **Web:** .NET, HTML, CSS, Java, Java Script
- **Reporting Tool:** Jira, Splunk, Confluence, Assyst
- **Methodologies:** Agile, Waterfall
