Project

Project – CUDA

Period:

November 2018 - September 2019

Experian is a leading consumer credit reporting company. Experian collects and aggregates information on over one billion people and businesses including 235 million individual US consumers. Salesforce is being used by customer service Agents in Experian to handle the service and support.

It aims at making salesforce as an additional channel for performing credit bureau related services like Freeze, Opt-in Opt-out etc., so that the customer service agents will be able to enable/disable credit related services to the customers.

The design for CUDA involves proving UI using custom lightning component development and calling corresponding REST APIs to perform the operation requested by the user.

ROLES and RESPONSIBILITIES:-

- Taught diverse student population by employing various learning styles and abilities.
- Used variety of learning modalities and support materials to facilitate learning process and accentuate presentations, including visual, aural and social learning modalities.
