Selected Relevant Experience

Life Science – QA Lead

I am leading a 12+ members Saleforce testing team where I guide and help testing efforts project wide between Oct'19 – Present.

• Planning, creating, and, authoring various test scenarios and scripts to ensure the application's data flow is working according to the functional logic and business rules.

• Investigating, researching, and recommending the implementation of commercial automated test tools and test scripts for regression testing of existing product functionality

• Developing Test strategies to help drive excellence across all services and the overall platform for project completions

HealthCare – QA Lead

I lead a DWH/ETL Testing project across 16+ testers across location. Data Exchange team was validating the data extracts and reports that helped the client to perform analytics on their health plans and claims between Nov '16 – Oct'19.

• Define DWH/ETL Test Strategy to help DX testing team with defined approach and achieve testing goals.
• Worked collaboratively with Product owners, Dev. Managers, Vendor Managers, and the other team members of various active products to get the best out of the QA team to ensure smooth delivery.
• Lead the development and execution of the QA strategies, plans, cases, and test data
• Leading daily scrum and weekly Testing status calls across teams.

Insurance – QA Analyst/QA Lead

I led SIT, E2E and Hypercare test teams for an Insurance client by delivering 2 API testing Major releases and 5 minor releases between Sep'13 – Nov '16. These activities included:
• Leading manual, automation testing teams across all testing phases. Develop Test Automation strategy/plan and work with multiple vendors across all testing phases.
• Leading weekly Release Management discussions go over testing status across all projects, mitigate risk & issues and address unplanned scope management and critical defects.
• Leading project kick off and closure phases with necessary documents across each testing phase and track approvals.
