📅 01/2017 - 01/2019 📍 Pune

Accenture is a leading global professional services company.

PROJECTS

Johnson and Johnson

Implemented Salesforce Quip

- I implemented Salesforce Quip from the scratch for the whole Project. The main highlight was attaching a quip document to the salesforce record when the record was created/ modified.

Abbott

I am a part of the run team which takes care of the Abbott Diabetes Care (ADC) module. It is a custom Sales Cloud Implementation.

- Performed different enhancements in the project where I have worked on Lwc components, lightning flows, batch classes, integration, etc.

Novartis

I had worked on patient survey module of Novartis. In this survey, feedback of patient who was administered a medicine was recorded.

- I had used lightning flows, dynamic buttons(beta), layouts, record types, triggers, workflows, process builders, etc.

Hindustan Times

Our team migrated the system from custom configuration to standard Salesforce configuration where it was possible.

- I had worked on Lead conversion, Apex, visualforce, SOQL, triggers, Standard & Custom Controllers, batch classes, process builders, etc.

EDUCATION

B. Tech - (CSE)   80.34%
