

Resume

Himanshu Lokhande

Software Development Engineer

Email: himanshulokhande1995@gmail.com

Contact: +91 7828 24 5143

Career Objective

Flexible and adaptable person with a zeal to learn new technologies while constantly trying to improve existing skill set, looking to work in an invigorating and encouraging environment.

Experience Summary

- Have a complete understanding on how Application work which includes code written in backend and its communication with frontend, deploying code to server and its Unit testing
- Successfully handled Application production LIVE which included PT, SIT, UAT and NFT testing

Experience as Backend Developer

- Developing a Product and Web application for telecom Industry
- Used backend technologies like **Spring Boot, Java 8, Maven, couchbase DB, NoSql**
- Analysing and converting business requirement into code
- Developed API with end to end testing
- Used Sonar qube for code quality and security
- Used Mockito to write unuit test case for the APIS
- Used YAML for spring boot configurations
- Used restful web services
- Used Maven plugins for project configuration
- Deploy, Test and bugfixing of already running application

Experience as UI developer

- Developed web applications for Banking and finance and Telecom Industry.
- Used all latest technologies like **React.js, Redux, Redux-Saga TypeScript, Agile, Node js, JavaScript(ES6), Bootstrap, CSS, Jest and Enzyme for unit testing.**
- Solved multiple defect which are encounter by the testing team during project development lifecycle while taking care of deadlines
- Triggering, monitoring and fixing Jenkins Build
- Designed site as per ADA Compliance.
- Build responsive website compatible with mobile and web browser
- Working with cross functional environment
- Conducted seminars to new trainees
- Used Git as a SVN
- Work with JIRA
- Css Pre-Processor: **Less, SCSS**

Experience as Full Stack developer

❖ Telecom product

- Design and developed microservices API and react-redux components
- It allow stake holder to give permission to various permission to backoffice Admin to employee
- Allow to view and modify existing permission
- Used Spring boot for backend development and react-redux as front end library
- Used **Mockito** is a mocking framework for unit tests of APIS
- Used MAVEN as Project tool
- Used YAML for API configuration

❖ leave management system

- Design and developed Java Application
- It allows stakeholders to view, apply and approve leaves.
- Design using Java JDK 1.6, Angular4 and MySQL
- Used Junit for testing
- Used Restful web services

Highlights

- Hands on Experience in UI backend technologies like **Spring Boot, Java 8, Maven, couchbase DB, NoSql, Mokito**
- Hands on Experience in UI development (**React JS, Redux, Angular 4 , Agile, JavaScript, Java, Bootstrap, Node.js and testing tools like Jasmine and Enzyme**)
- **Handled defects During time of pre and post productions of application**
- Individually developed, tested and deployed module to server and deliver successfully to Testing team
- Successfully completed code demo to the client after functional testing of modules which are under teams ownership
- Provide solution to client for any change requirement and implemented it
- Created multiple documents to support the application which are largely used till date.
- Created the Documentation of the react components developed in project
- Testing of component and API with code & Branch coverage greater than 80%
- Complete understanding of JSON structure
- Hands on with Enzyme and jasmine for unit testing
- **Helped Fresher to Scale up them at Industry level by transferring them knowledge and small code assignment so that they can work with technologies**
- Part of team which mentor and help fresher and lateral hire provide them knowledge regarding product framework and its working.

Profile Skills

Programming Languages	Java, Javascript
Scripting and Web framework	React.js, Redux, Redux-saga, JavaScript(ES6) Node js, Type Script Jest, Enzyme
Framework	Spring boot
Versioning Control	GIT, Bit-bucket, perforce, GIT CLI
IDE	Eclipse, IntelliJ Idea, STS, VS code
Others	Html, CSS, Maven, Sql, NOSQL, Jenkins, Jira, Confluence
Operating System	Windows 7,8,10

Qualifications

Degree and Year	Institute	Major and Specialization	Percentage
Bachelor of Engineering, 2017	Gyan Ganga Institutes of Technology and Sciences, Jabalpur (M.P)	Electrical & Electronics	81.07 (HONORS) CGPA- 8.17

Professional Experience

Web Product	E Commerce Product for Organization
Description	<ul style="list-style-type: none">Developing a product that is consume for other developer so that their coding time and effort decreaseDeveloping scalable Product UI so that they can be easily Modified and used by other applicationDeveloped API for different crud operation which are used According to the client requirementsTest API with 80% code coverage
Role	Full Stack Developer
Tools	Git, Vs Code, JIRA, JENKINS
Technology	Spring Boot, React js , Redux, typescript, mockito, Enzyme and Jest for unit testing , Node js, HTML, CSS , web service(API)

Web application	E commerce application for Internet and Broadband provider
Description	<p>It is the web based application for user so that can</p> <ul style="list-style-type: none"> • Purchase product • Purchase plan • Modify and view plan • Upgrade plan and internet speed • Upgrade product • Pay Bill <p>Developed Customer journey from buying to managing product</p> <p>Application is compliable with all browser</p> <p>Responsive application which is compatible with Mobile and Web browser</p> <p>Flows are internally integrated with one another</p>
Tools	Git, Vs Code, JIRA, JENKINS
Technology	React js , Redux, Enzyme and Jest for unit testing , Node js, HTML, CSS , web service(API)

Web application	Banking Payment Application
Description	<p>It is the web based application for Transfer and Payment.</p> <p>User is able to transfer payment to self and others Banking account as well.</p> <p>Flows are internally integrated with one another</p>
Role	Developer
Tools	Git, Vs Code
Technology	React js , Redux, Enzyme and Jest for unit testing , Node js, HTML, CSS , web service(API)

Web application	React Code generator tool
Description	<p>Developed a tool that generates the code for React component which includes JavaScript, less and test cases files</p> <p>It makes use of templates containing the skeleton/boilerplate code with placeholder, which when fed with the user provided Data, Generate the code to be used in the project.</p> <p>It was demonstrated and well accepted by the client as well</p>
Role	Software Developer
Tools	Git, Vs code
Technology	React.js , Redux, Enzyme and Jest for unit testing , Node js,Yeoman Code Plugin

Application	Employee Leave Management System
Description	<p>Leave Management System which allow user to view, apply and approve the leave</p> <p>User may able to apply the leave according their leave balance</p> <p>Manager are able to approve the leave</p> <p>User is able to see their leave history</p>
Role	Developer
Tools	Maven, Git
Technology	Java, MySQL, Junit, Angular4, Html and Css

Personal Details

Date of Birth	12/03/1995
Sex	Male
Nationality	Indian
