## Certifications

○ **Salesforce Certified Adminstrator**

○ **Salesforce Certified PD1 Developer**

## Projects

**Leads Console**
*Salesforce*                                                         *August 2019–Present*

Developed Salesforce Leads Console with custom Aura Components
Created Batch Classes for existing workflows to accommodate complex business rules
Data Migration carried out for new features introduced.
Translations are implemented across the Leads Console for four languages
Handled the deployment of the code to Git-Lab in order to deploy it to the QA Sandbox .
Worked On AWS side of the leads console to populate the required fields before inserting lead records into the salesforce.

**Salesforce DocuSign**
*Salesforce*                                                         *November 2019–January 2020*

Worked with Docusign Integration Team to understand business logic
Implemented aura components like pagination and Data table to show the lead records on visualforce pages

**CXT (Communities)**
*Salesforce*                                                         *April 2018–August 2019*

Created Aura Components based on the screens provided by the business
Developed some future calls to retrieve data from third party websites
Appreciated For Work Done on the UI Front.

**Feature Release**
*Salesforce Testing*                                                    *March 2020–June 2020*

Worked on Testing the salesforce functionalities and translations.
Written Test case scenarios for testing
Later Moved on to the development team as per my earlier project Lead Request

**FIFA Prediction App**
*Salesforce Internal Project*                                      *November 20218–January 2020*

Designed the application to predict winners in FIFA matched
Automatic email's were sent to the winners
At the end of the tournament winner was sent an appreciation mail based on the score
Developed the application as part of Salesforce Learning
