GIT Profile:

<https://github.com/attainu/shubhankar-bisht-au5>

Projects:

**DRS:**

Data review system is a project developed for the AT&T project inside IBM. It consists of an employee login portal. From this portal employee manages to see all company related updates and well as manage individual data.

Technogies Used:

HTML5,EJS,CSS,NODE JS,MongoDB,Bootstrap.

**Outreach:**

Outreach is a personal project designed for reviewers as DRS was internal company. It is a unified platform for users to interact with one another and organize events and manage their profiles. From this portal employee manages to see all company related updates and well as manage individual data.

Technogies Used:

REACT JS,CSS,NODE JS,HEROKU,MongoDB

**Watcho:**

Watcho is an OTT project used to serve Tv shows , series, etc, on OTT platform as well as web, mobile and android platforms.

We worked on Digital rights management(DRM) content as well as free source resources.

Technogies Used:

Angular JS,CSS,NODE JS,HEROKU,MongoDB,Nginx, Pm2

### Watcho-Khelo aur Jeeto:

Watcho-Khelo aur Jeeto is a of the Watcho Project and was launched to make the app more popular.All dish /D2h users can play the quiz all day and everyday a selected winner is announced via CRON jobs on server.The quiz also consists of a dashboard from where administrators can manage accounts as well as prizes.

Technogies Used:

React JS,Angular JS,CSS,NODE JS,MongoDB,Nginx, Pm2

### Watcho on Samsung Tizen:

The watcho application was launched on Samsung Tv for paid watcho users as well as new samsung users.

A PAYTM integration is done for payment purposes and a seperate signup has been created for the same.

Technogies Used:DOT JS,Navigo JS,Gulp JS,CSS,NODE JS,MongoDB

### Dish Analytics:

Dish Analytics is my latest project which provides the management an insight on smart data of Dish/D2h users.

It provides data like what the user is watching on the television ,for how many hours , and so on.

Technogies Used:React JS,CSS,NODE JS,MongoDB,Nginx, Pm2
