PROJECT ON SALESFORCE

Eat-Easy (Online Food Delivery Application), A customer can order the food through Online Website. Customers can Order Food Easily by choosing the Time Category like (Tiffin, Lunch, Evening Snacks, Dinner) Customer Can Select Different Payment Methods like UPI, Net-Banking, Cash-On delivery & Cards. After Placing the order His/hers Gets Food Invoice & Auto Generated ORDER NUMBER, Body Temp of Delivery Boy and Live-location link to Register Email id & phone Number by that customer can track the order. Customer need to provide the Order Number to Delivery Person to Collect the Order. The Delivery Boy will enter the Order Number in Delivery portal by that customer gets Delivery Confirmation Message with Feed-Back Description.

This Application is Developed with Lightning Experience And Website is Developed with JavaScript framework for creating single page applications, and Lightning Components with Apex Class, HTML/CSS framework and component library for building lightning styled apps.

MINI PROJECTS:

- Automatic power on-off system.
- **Mini project:** Vortex Tube

MAJOR PROJECT:

About: FABRICATION OF EMERGENCY DRONE

Finally we use our drone, we must be sure that everything works well, A GPS module measures the drone's location. A GPS module is also able to give an estimation of your drone's altitude. , so our drone can potentially fly on its own from take-off to landing.

Drones have become necessary to the security of the American people. It is obvious that drone technology is an important part of the future of warfare and is set to become a big commercial industry.

Role   : Team leader

Technology: GPS module
