

## Priya Verma

Mob: 7217217718

Email-id: priyaverma.rajput10@gmail.com

### Professional Summary:

- **5+** Years of experience in Software Development using UI technologies like HTML5, CSS3, Bootstrap, Sass, less, JavaScript/ECMAScript, typescript, Tailwind Css, Angular Material.
- **2+** years of hands-on experience on UI design photoshop & illustrator.
- Basic knowledge about Unit Testing.
- Knowledge of Version Controls (BitBucket / GitHub / Git)
- Basic knowledge of ReactJS and Redux.
- Understanding of build tools and package managers.
- Hands-on experience on creating custom components, modules & libraries using angular.

### Business Domain/Functional Areas:

Experience in multiple domains from banking, marketing companies, Blockchain, etc.

### Technical Skills:

<b>Programming Languages/ library/ frameworks</b>	Angular, React
<b>Technologies (UI/Web/other)</b>	Angular 2+, Tailwind Css, Angular Material, Bootstrap, CSS3,HTML5, Javascript ReactJs, Redux, UX, Performance Testing, Office 365
<b>Scripting Languages</b>	JavaScript/ECMAScript
<b>Version Control</b>	BitBucket / GIT / GitHub
<b>Operating System</b>	Windows 10 and Windows 11.

### Certification:

Angular Certified Developer(Level 2) made by **Angular GDE**

### Professional Experience:

- **Iris Software Technologies (P) Ltd** (Senior Engineer - Technology) June 2023 - April 2024, Noida
  - **Description:** Design and develop web applications using Angular frameworks. Currently working on internal projects.
  - **Business Domain/Function:** Internal Product, Banking
  - **Environment/Technology Stack:** Angular 12/14, Typescript, Angular material, AG-grid, HTML5, SCSS
  - **Project Role:** UI developer
- **DLT Labs Pvt Ltd** (Software Engineer (Band-1) Jan 2021 - June 2023, Noida
  1. **DL-Unify/DL-IAM** (Sep 2021 – May 2023)

**Description of the project:** DL unify is a platform for developers/enterprises for blockchain & web3 projects. DI-IAM is a microservice within the DL Unify platform that serves different needs around Identity and access management.

**Business Domain/Function:** Internal Product, Blockchain

**Environment/Technology Stack:** Angular 12/14, Typescript, Angular material, TailwindCSS, HTML5, SCSS

**Project Role:** UI developer

**Responsibilities:**

- Involved in requirements gathering, analysis, design, implementation.
- Translate UI designs into fully-functional interactive with using HTML, CSS3, Tailwind, Angular 12/14.
- Build high-performance, reusable code, e.g. UI components.
- Consuming ReSTful APIs
- Worked on encryption decryption service for secure data & rest API based communications (frontend).
- Developing features to enhance the user experience.
- Used JIRA for defect tracking.

**Accomplishments/Results:** Handled both projects individually.

**2. Project : NFT Engine (Jan 2021 – Sep 2021)**

**Description of the project:** It's a marketplace for NFTs. Users can login with MetaMask wallet & then they can create an artist profile and mint an NFT or purchase artwork from this site. This is the platform where artists can display their exclusive works.

**Business Domain/Function:** web3 marketplace for NFTs and crypto collectibles

**Environment/Tools:** Angular 12/14, Typescript, Angular material, TailwindCSS, HTML5, SCSS

**Project Role:** UI developer

**Responsibilities:**

- Involved in requirements gathering, analysis, design, implementation.
- Design and develop web applications using Angular frameworks
- Collaborate with teams to identify and prioritize features and improvements.
- Build high-performance, reusable code, e.g. UI components.
- Consuming ReSTful APIs

**Accomplishments/Results:** Received appreciation from the internal team as I was able to create an Angular application that allows users to log in using their Web3 wallets

**● Decimal Technologies Pvt. Ltd**

**(Senior Software Designer) April 2018- Jan 2021, Gurgaon**

**1. Project : PWA Framework (Jun 2020 – Jan 2021)**

**Description of the project:** The purpose of the "PWA/RWA Application Framework" in Decimal is to provide a framework with a set of libraries and rules that can be used to create and configure PWA or RWA applications that work on Mobile (Android & iOS) and Web. A developer with these sets of libraries will be able to rapidly develop PWA and Responsive Web applications. PWAs are an advanced version of RWAs favoring a mobile-specific environment. Whereas, RWAs deliver a consistent user experience across different platforms. Both use a single code base, PWAs focus on the mobile-first environment while RWAs use it for both mobile and web platforms.

**Web Application :**

- Mexico : View account opening Digital Contracting.
- AU Credit Card : Check credit card offers, eligibility criteria, features and benefits

**Business Domain/Function:** Banking

**Environment/Tools:** Angular 9, Typescript, PWA, AG-grid

**Project Role:** Senior Software Designer

**Responsibilities:**

- Involved in requirements gathering, analysis, design, implementation.
- Design and develop user-friendly and responsive web pages and applications
- Worked with Angular 10 & PWA to develop single page applications.
- Consuming ReSTful APIs

**2. Project : Platware-client (April 2019 – Aug 2019)**

**Description of the project:** Platware Clients act as a middleware for request and response. Developer can integrate platware client SDK in any JavaScript project HTTP

**Business Domain/Function:** Banking

**Environment/Tools:** npm, javascript, encrypt and decrypt module like RSA, AES, SHA512

## **Project Role: Senior Software Designer**

### **Responsibilities:**

- Developed secured web applications by using client scripting such as JavaScript and JQuery.
- Worked on encryption and decryption (RSA,AES, SHA512), npm & end to end implemented functionality testing.
- Coded end to end (i.e. from GUI on Client side to Middleware to database and Connecting the back-end Systems)

### **3. Project : Vahana Hub(Product) (Sep 2018 – May 2020)**

**Description of the project:** Vahana is a “No Code” Platform and has limitations in options of implementation, it is implemented using Industry best practices followed by Enterprises.

### **Web Application :**

- vConnect : Central API management services with readily available integrations reduce hassles & TCO for enterprises. Our robust middleware ensures that agile front-end applications can readily communicate with core systems.
- Lander portal : The portal is to be used by the Sales Managers from the Lender organizations. The SMs who manage business from the DSA/Partner channel will use the portal.

**Business Domain/Function:** Banking

**Environment/Tools:** Angular 4/5/6/8, Scss,Typescript,AG-grid,ES6, CSS3,CSS flex

**Project Role: Senior Software Designer**

### **Responsibilities:**

- Design and develop user-friendly/responsive web pages.
- Cooperating with the back-end developer in the process of building the RESTful API

## **• Oodles Technologies Pvt. Ltd**

**(UI Designer) March 2016 - May2017, Gurgaon**

### **1. Project : Acl admin zone/ panel (Sep 2016 – May 2017)**

**Description of the project:** Admin-Zone is a configuration tool which is used by messaging platforms and traffic analysers for an enterprise. It is used for configuration of message templates, keyword, code for sending the bulk messages as well as used in MSISDN,MSISDN series,circle and network operator whitelisting.These SMS/Messages can be promotional or transactional in nature.Basically it is used to provide messaging services for an enterprise nationally and internationally.

**Business Domain/Function:** Client

**Environment/Tools:** Angular 2 ,HTML5, CSS3, Bootstrap, Less Js, JavaScript, jquery

**Project Role:** Frontend/UI designer

### **Responsibilities:**

- Design user-friendly and responsive web pages and applications.
- Used Media Queries for the design to be compatible in all devices.

### **2. Project : Lyfeline Milestones (Mar 2016 – Sep 2016)**

**Description of the project:** It is a mobile app using cordova technology(for android and ios devices). It monitors and tracks every activity of the child and gives information about the child's better upbringing and development

**Business Domain/Function:** Client NGO

**Environment/Technology Stack:** HTML5, CSS3, JQuery

**Project Role:** Frontend/UI designer

### **Responsibilities:**

- Worked on app pages Designing & applied jQuery scripts for basic animation and end user screen customization purposes.
- Used Media Queries for the design to be compatible in all devices.
- Used git for merging code and branches and trello for defect tracking.

## **Education:**

Higher Secondary School 2010

Graduation(BCA) 2013
