# *Summary and Objective*

Seeking a **C# Developer, Software Developer or Engineer** position.
Experienced and results-oriented *Software Engineer,* loving application design and programming and database development, working in a variety of environments with a breadth of programs and technologies.
Enjoy challenge and being an engineer; able to handle changes and pressure. Team player and self-directed setting.

# *Technical Skills and Core Competencies*

### *Software Development and Web Programming:*

- C#, ASP.net, MS Visual Studio, Entity Framework
- JavaSript, XML, HTML, CSS, SQL, Perl, Microsoft Visual Studio and Office 365 Suite.

### *Database:*

- Oracle 12 databases, Golden, Todd
- SQL Server 2014 and 2016, SQL Server 2014 management studio.
- Oracle and SQL Server Stored Procedures, Functions, Packages, triggers.

### *Methodologies and Third-Party Components:*

- VS Team Foundation Services (TFS) Version Control
- Atlassian JIRA, Agile,POSTMAN API

# *Professional Experience*

## *Senior Software Engineer*               *08/2013 ~ 12/2019*

### *IQVIA/IMS Health, Inc., Bridgewater, NJ*

- Worked closely with business units, implementation engineers and QA teams to analyze business requirements, and designed and created interface and specifications for applications accordingly.
- Developed and deployed innovative solution for global major health care and pharmaceutical companies for users' data collection and process.
- Took ownership in building Virtual Machines, loading applications and security setting; then provided URLs to internal QA and external users for pilot testing prior to final release.
- Provided modification, updates, error fixes and supports toward existing applications and documented code changes.
- Other daily and routing works including JIRA tickets tracking, joint remote work with the offshore team to provide training and knowledge exchange. May direct contact internal customers and assist them.

## *Programmer/Data Analyst*                                    *04/2010 ~ 03/2013*
**GENEX Services, Inc./ CIGNA Health Insurance, Philadelphia, PA**

- Point of contact, 24x7, at management team during database upgrade, implementation and migration.
- Maintained multi clients' database, carried out data import/export, analysis and reports, update and implementations database connection to application.
- Managed and monitored the status and performance of database and application efficiency.
- Utilized database tools to create reports used by management team to make changes to workflow.
- Worked with the other team members for application upgrade, reviews and correct error for improving performance; provide on-call support on rotational basis.

## *Application Team Leader*                                    *05/2001 ~ 10/2009*
**Dendrite International/Cegedim, Bedminster, NJ**

- Joined meeting, communicating and worked closely among team members, across teams, and with the business client to gather, analyze and exchange technical information, then create and implement policies and procedures accordingly.
- Reviewed, recognized and utilized individual team member strength toward assigning tasks and resolving various issues and following-up software / application-related problems.
- Reviewed reports, analyzed data and conducted pro-active actions; fixed errors and reloaded data, and re-spooled correct data to front-end users. Interacted with the Help Desk / Customer Support Team and recommend corrective actions on application issues.
- Possessed the ability to write and perform complex SQL queries, create tables, synonyms, sequences, views, indexes and triggers and code embedded PL/SQL, Stored Procedures, Functions and Packages to retrieve information from Oracle databases.

# *Education*

## *Mater of Science in Engineering*                            *09/1988 ~ 12/1990*
New Jersey Institute of Technology
Newark, NJ 07102
