Credential ID : **20333602**

At a Glance

Implemented a new VF based tool which especially helps the regional product modeling community to figure out the reasons for non-visibility of items in the APTTUS Configurator and reduces the time and effort, explicitly.

The development of VF tool involved extensive use of Visual force, Apex Class, Custom metadata, Java script, HTML etc.

Developed Batch Apex for the new case form, revamping the existing Commex Case system, to match the new ITIL standards.

Experience

Developer - Tata Consultancy Services, Bhubaneswar

Client – GE Healthcare, US (October 2018 – Present)
Working on Apttus CPQ, bundle creation, categories, constraint and attribute rules, price list and matrices, etc across various product modalities at GE Healthcare.

Implemented new functionality by writing Apex Class, Visual force, Java script, Custom metadata, etc and deployed it to production.

Unit testing of developed code with minimum 75% code coverage before move out to prod-copy instance.

Involved in Release testing and implementation of new Apttus functionalities in Performance and other instances.

Worked on X-Author apps for bundle product and price list creation and migration.

Proficient in creating Objects, profile, role, users, page layouts, record types, formula fields, roll-up summary fields, relationships, etc.

Experience in the area of Customization, Validation rules, Work flow rules, Report, Dashboard, Custom setting, etc.
