## Projects Undertaken

### 1. VPS(Visual program Scheduling)

- Client: FOX Entertainment's.
- Technologies: Salesforce.com, Force.com, Apex, Lightning Web Component.
- Duration: Sept 2019 – till date
- Project Description: VPS is FOX Entertainment's scheduling application which manages fox schedule programs in salesforce using a grid like structure implemented in lightning web components. Scheduling happens in two ways: linear module and programming module. Fox media like news, movies channels comes under linear module and on-demand programs comes under programming module.
- Responsibilities:
- Project Management and Business requirement analysis.
  - Design Project Architecture.
  - Development and Deployment
  - Code Review

### 2. Mercer Force

- Client: Mercer Inc.
- Technologies: Salesforce.com, Force.com, Apex, Lightning Web Component.
- Duration: Dec 2019 – Aug 2019
- Project Description: MercerForce is an application of Mercer client which manages customer data in salesforce using sales and service cloud. This project involves creation of custom home pages for different Personas(profile) using lightning web components and also handle business logic using apex trigger, batch apex and reporting.
- Responsibilities:
- Project Management and Business requirement analysis.
  - Design Project Architecture.
  - Development and Deployment
  - Code Review

### 3. Power Component

- Client: Enigma's Product.
- Technologies: Salesforce.com, Force.com, Apex, Lightning Web Component.
- Duration: April 2019 – till date

**Project Description:** Power Component is a product of Enzigma software developed in Lightning web component framework. It is used to modify related objects record on current record page. You can arrange parent and parents related records on a single page and it also gives you power to edit all related records on the same page. Users can configure the record page using comma separated field and Field set.

**Responsibilities:**

- Project Management and Business requirement analysis.
- Design Project Architecture.
- Development and Deployment

#### 4. **Foundation Connect**

**Client** Salesforce.com.

**Technologies:** Salesforce.com, Force.com, Visual Force, Apex, Communities, ASP.NET.

**Duration:** April 2018 – March 2019

**Project Description:** Foundation Connect is a CRM and Grants Management system for foundations. It had different portals for Grant Management, one for the grantee and one for reviewer. Wherein, a grantee can apply for specific Campaign and also submit Lead/Opportunity and manage the status reports and many more. And the Reviewer can review the respective grantee's application and provide respective feedback.

**Responsibilities:**

- Project Management and Business requirement analysis.
- Design Project Architecture.
- Development and Deployment
- Client Handling.

#### 5. **WorkForce**

**Client:** SureScreen Derby (UK)

**Technologies:** Force.com, Visual Force, Apex, Entity Framework, C#, .NET MVC.

**Duration:** Nov 2017 – March 2018

**Project Description:** Workforce is a firm that provides a platform for various organizations to perform Drug and Alcohol tests including provision from sample kits to sample result re-verification in the lab.

**Responsibilities:**

- Project Management and Business requirement analysis.
- Design Project Architecture.
- Development and Deployment
- Client Handling.

#### 6. **FTP Attachment**

**Client:** Enzigma's Product.

**Technologies:** Force.com, Visual Force, Apex, SQL Server 2013, C#, Asp.Net, SLDS.

**Duration:** March 2017 – Oct 2017

**Project Description:** FTP Attachments is an ASP .NET based web application that rides on salesforce.com and allows you to upload and store attachments on your personal server rather than on the salesforce server. FTP Attachments seamlessly integrates with the salesforce UI and offers a lot of benefits over native salesforce attachments.

Responsibilities:

- Project Management and Business requirement analysis.
- Design Project Architecture.
- Development and Deployment
