1) PRIMESOFT IP SOLUTIONS PRIVATE LIMITED. HYDERABAD, INDIA

Software Engineer

PROJECT OVERVIEW:

Application is used to take care of patients who are suffering from the disease like some patients are suffering from the big disease. This application is used to store and manage the information about health and disease related and also used to store the information about the patient, doctors, and account means clinical information.

TECHNOLOGIES USED: *Aura lightning component, Trigger, Test class and lightning flow.*

ROLES AND RESPONSIBILITIES:

- Developed and modified the existing lightning component.
- Performed the logic in the apex trigger to display the data on the record page.

2) PERSISTENT SYSTEM LIMITED. PUNE, INDIA

Software Engineer

PROJECT OVERVIEW:

It is a platform which gives the user access to the relevant content recommendations based on the user's interests. Quick access to the channels and full content search. Its Knowledge Cloud solves the problem of Unified Discovery, Unified Access and Unified Tracking across the enterprise. This includes curating and delivering fragmented internal, external and Subject Matter Expert (SME) content needed by employees, customers, and partners in their daily flow of work.

TECHNOLOGIES USED: *Aura Component, External API integration in Apex, Apex classes, Custom Objects.*

ROLES AND RESPONSIBILITIES:

- Integrated the third party library to collect the channels and list of content.
- Developed the Lightning component to show the content in a card view.
- Performed the logic in apex to save the preference of users for cards.

3) KSOLVES INDIA LIMITED, PUNE, INDIA

Software Engineer

PROJECT OVERVIEW:

The organization needed a Force.com cloud application which could centralized the different insurances processes. Nation-Wide staff is works for insurances like vehicle insurance, medical insurance etc. Nation-Wide agent creates customers and feeds customer's data. This data then verified and approved by regional managers then.

TECHNOLOGIES USED: *Lightning, Apex Data Loader, Triggers, Visual Force, Apex, HTML and JavaScript.*

ROLES AND RESPONSIBILITIES:

- Contributed to the development of Salesforce solution - Created lightning component to for communities to locate and create insurance applications.
- Assisted in analyzing business and technical requirements and designing standard objects of Salesforce.com for insurance applications / applicants based on project specifications.
- Designed Custom Objects and developed and deployed Apex Classes, Controller Classes and Apex Triggers for various functional needs of the application.
- Created a Visual-Force page to implement custom search functionality as well as validation rules, workflow rules to meet the functional requirements.
- Implemented Batch Apex, schedulable batch Apex.
- Participated in Scrum Planning (Agile methodology), Daily Scrum & Apex test classes for unit testing to ensure maximum code coverage.
- Utilized Force.com developer toolkit to develop custom business logic and as well as completed bulk imports of data using Apex Data Loader.

4) VIBRA TECHNOSYS, PUNE, INDIA

Salesforce Developer

PROJECT OVERVIEW:

- An app which performs CRUD operations in a very easy and intuitive way. It helps the org Admins for performing Select, Create, Delete, Update, Edit operations quickly.
- It helps to build SOQL queries with a good UI
 - Multi Select picklist for select fields.
 - Dropdown picklist for ordering, sorting, null options and integer field for limit.
 - For filter in query: provide field type input field (ex. For date field provide date picker to select date) to enter data and also provide dropdown to change AND and OR in query.

TECHNOLOGIES USED: *Aura Component, Apex, SLDS, Metadata, SOQL, Javascript.*

ROLES AND RESPONSIBILITIES:

- Migrated the Visualforce page in aura components.
- Implemented the pagination to show more records.
- Exported the records in CSV.
- Performed the bulk updated.
