

Prabhat Kumar Pandey

Voice: 8120666520

Email: prabhatpandey142@gmail.com

Summery:

- 4+ Years of IT experience in Analysis, Application Development, Maintenance, Linux System programming.
- Effective in leading applications with end-to-end responsibilities using **C++** and SQL to exposure content or task.
- **C/C++** developer with experience in Object Oriented Analysis and Design (OOAD) and Object Oriented Programming (OOP).
- Experience in **LINUX IDE** for **C/C++**, **LINUX Shell Scripting**
- Good understanding of various software development models like **Agile, Waterfall, and Spiral.**
- Experience in designing, developing middleware components and Desktop/GUI applications for software in **C/C++ using STL, multi threading, data structures**, and Knowledge of **Core Java Development.**
- Experience in **Agile** and **Scrum** methodologies.
- Experience with **RDBMS** systems (e.g. **MySQL**)
- Good Knowledge in debugging using **GDB**
- Strong knowledge in **GIT HUB**

Educational Qualifications:

- Completed **B.E. (ECE)** from **RGPV Bhopal** in **2016.**

Professional experience:

- Presently working at **Eterno Infotech Pvt Ltd Bangalore**, as a **Senior Associate** from **June 2018 to till Date.**

Technical Skills:

- **Languages** : C, C++, Java, SQL, Embedded C
- **Client Technologies** : HTML
- **Database Tools** : SQL 7.0/2005/2008/2012 Developer, RDBMS
- **Platforms** : Windows 8, 10, Ubuntu
- **Misc. Tools** : Notepad, Notepad++
- **Database Servers** : MS Access
- **IDES** : Eclipse, Visual Studio Code
- **Other** : Knowledge of Computer Networking, PCB Designing, SDLC, JIRA, Manual Testing

Responsibilities:

- Work as a content operations variety of platforms including windows, **Linux** distribution using **C++**.
- Development of new modules for **UNIX C++** applications.
- Optimization and tuning of previous applications.
- Experience in developing middleware components for software in **C/C++** using **STL, multithreading, data structures**
- GUI development using cross platform tool like **Qt** and exposure to Linux system programming.
- Developed **HTML** reports
- Preparation of Unit test cases and execution of test cases.
- Reading existing source code in C to determine current programming logic.
- Working with SQL database including making enhancement to stored procedures.
- Created stored procedures and Written UNIX and shell scripts for testing the application and writing the **SQL queries** for database.
- Did programming in **C++** on **LINUX** platform to contribute to the software project, which automated customized design process
- Did unit testing of programming projects.
