## Work Experience

**Salesforce Developer**  
**Molars Technologies pvt ltd.**

**June 2021 - Present**

### **Employee Leave Management System**

Employee Leave Management System (ELMS) project provides a platform to automate all the employee leave activities where we can maintain all the data of employee, leave applications, Monthly Work and Target, Appraisals, etc.

#### **PROJECT OVERVIEW :**

Employee Leave Management System (ELMS) provides a platform to automate all the employee leave activities. It provides employee data exchange capabilities. Managers get a single, fully integrated view of employees within their own native ELMS and workflow. That gives them immediate access to actionable information for better decision making – and superior coordination.

#### **ROLES AND RESPONSIBILITIES :**

- Customize and personalize Salesforce.com based on requirements.
- Creating Objects and Validation Rules inside Salesforce.com and Mapping them to the existing functionalities and Objects.
- Worked on various salesforce.com standard objects like Accounts, Contacts and Opportunities.
- Maintain and developed the Custom objects, Custom fields, Custom tabs, and Validation rules.
- Customized different page layouts and assigned them for different profile users.
- Creating Workflow Rules, Tasks, Email Alerts, and Components to the needs of the application.
- Designed various Web Pages in Visual Force for functional needs within Salesforce.
- Worked on workflows for field updates based on time dependent workflow.
- Involved in creating action components based on client requirements.
- Involved in creating Batch Apex and Scheduling Apex classes based on the client requirements. Involved in field and record level Security.
- Have sent mail to particular users using Apex code.
- Import & Export of the Bulk data through Data Loader.
