EXPERIENCE

Apisero Inc. (NTT Data), Lead Engineer Aug 2021 - Present

- Worked with the team to implement Salesforce CPQ on Sales Cloud and also Contributed to the design and development of the Zuora Integration with Salesforce.
- Worked independently and collaboratively with team members to deliver complex LWC components for multilingual implementation on Sales Cloud, Consuming 10+ MuleSoft APIs.
- Developed automation to identify flat renewals and amendments in Salesforce, which were provisioned outside of Salesforce. This greatly reduced the amount of manual intervention required by the GTM team, helping them to complete tasks in less than 10 seconds.
- Served as an interviewer for Apisero and participated in the recruiting process.

Persistent Systems, Software Engineer Feb 2020 - Aug 2021

- Worked on Bajaj FinServ Project in BFSI sector with over million lines of code, multiple modules and thousands of users all over India.
- Contributed to the design and development of Key modules, such as KYC automation and release of complex Lightning Web Components, that have significantly improved the client's operational efficiency and customer experience.
- Involved in the development of desktop and mobile application on Salesforce.

Arxxus Technology Partners, Cloud analyst July 2019 - Feb 2020

- Worked with managed services for Cerebral Palsy Alliance client in the Health & Medical Sector.
- Participated in the enhancement, identification, troubleshooting of problems and errors as they occur on Salesforce Org.

StudyDuniya, Full Stack Intern June 2018 - Aug 2018

- Collaborated with a team to develop a web application, and played a key role in building and managing relational databases to store and handle application data.
