PERSONAL PROJECTS

Online Auction System

- Bridging the gap between buyers and sellers, Buyers get to evaluate the quality of the product via Internet. An online auction system that holds online auctions of various products on a website and serves seller and bidders accordingly. It helps the customer to sell and buy product in best price. It is developed with the objective of making the system reliable, easier and fast.

Data Analysis on Indian Election 2019 Using Hadoop

- Analysis of the Indian General Election 2019 using Hadoop. It is a Big Data project which helps to analyse various fields and features of the data. This is represented Graphically using a software called Flume. This Graphical Representation of Data can Easily show us the high, mid and low. This can be used for further election Campaigns.

Bubble Sheet Scanner and Test Grader using OpenCV

- The software automatically analyses the human marked OMR sheet for interpreting the result, using various Image Processing Techniques and OpenCV library.
