## PROJECTS

### MARKET 360

July 2021- Present

-Market 360 is a big data product and it is being developed to help the client to optimize and forecast their product information and other important insights. It is an on-cloud channel visibility platform to provide actionable insights on critical Digital shelf KPIs around price/promotions, product availability, seller analysis, content compliance, share of search and ratings and reviews.

### ERANGE

Sept 2020 - June 2021

-Erangle tool is being developed to help the client to optimize and forecast their product categories. We have made it more interactive so that the user can do the actionable insight and assortment easily through the different filters like search filter, checkbox filters, and other requirement specific global and local filters which are available on the different types of graphs, charts and tables using different kpi divisions like 'What if' scenario, recommendation summary, content profile, gap analysis and category performance.

### HOSPITAL ADMIN MANAGMENT SYSTEM

May 2020 - July 2020

-It is an Agile based application for hospital admin management where doctor and receptionist can manage their patients and all the hospital related data in the application itself using different pages as Dashboard, Profile, Patients, Appointments, Doctor Schedule, Payment.

## TRAINING AND CERTIFICATIONS

- RPA & Intelligent Automation from University of Toronto. (Feb 2022)
