Work Experience

Software Engineer | Societe Generale Global Solution Centre Pvt. Ltd. | Oct'21-Present

Key Result Areas:

- Building online portals using .NET, ReactJS, JavaScript, TypeScript, C#, and SharePoint; developing logical, user-friendly interfaces for portal projects effectively
- Developing responsive, dynamic user interfaces using ReactJS, component-based design, and virtual DOM for quick rendering; enhancing portal functionality and interaction using jQuery and JavaScript
- Utilizing TypeScript for scalable, maintainable codebases and ECMAScript capabilities, while using C# for business logic development, backend integration, and server-side management
- Leveraging SharePoint's collaboration & content management features to create personalized portals, creating dashboards, workflows, & approval procedures for data visualization & decision-making

Deputy Manager | Jio Platforms Limited | July'21-Oct'21

Key Result Areas:

- Worked on enhancing the functionality of the existing hardware by incorporating additional features; utilized the Linux environment, C, and DS for various software components
- Developed a client-server model token authentication system that utilized the openssl library to encrypt and decode keys

Projects

Title: Career Portal (RBO)

Description: Created a web application for company career paths, allowing employees to track progress and post properties, and discover available properties; utilized React for frontend design, SharePoint for hosting and storage, and C# for backend development; ensured user interface was responsive and adaptable to any screen size; Technology used: .NET ,React JS, TypeScript, SharePoint, C#

Title: HRUSECASE Portal

Description: Implemented a comprehensive HR system with admin and employee views, adjusting access levels for user convenience; the site allows users to submit leave, expense reimbursement requests, and authorize requests; this dynamic dashboard provides real-time insights, while the portal offers reports, graphs, and charts for HR professionals to analyze and visualize data; Technology used: React JS, TypeScript, SharePoint, C#

Title: Personal Portfolio Website

Description: Created a personal website showcasing experiences, abilities, and projects using HTML, CSS, JavaScript, and React JS and utilized Firebase for efficient hosting and accessibility [Portfolio Link](#)
