- Working as **Senior Software Engineer** in Newgen Software Ltd from Sep,2018 to till Date
- Working as **System Engineer** in Intellect Design Arena Ltd. from Oct,2016 to Sep,2018

Project Experience Summary:

Projects	e-Gov Office Product Development (Product Video Link)
Role	Development of Product
Environment	Java, J2ee, Spring boot, Angular, Mssql, Jboss 7
Description	<ul style="list-style-type: none">● E- Gov Office is one such offering, which automates day-to-day functions at all levels of the administrative hierarchy. It combines Business Process Management and Document Management Solutions to deliver a unified platform for Government to Citizen (G2C), Government to Business (G2B)● Key Features<ul style="list-style-type: none">➤ Electronic correspondence (DAK)/ file creation, management, movement and performance of related tasks like diary entry, indexing, cross referencing, search/ retrieval etc➤ Notes to share between desks in organization➤ 3rd part Rich Text Editor Integration within Product to support Notes

	➤ Electronic processes and interoperability that would ensure reduction of delays in decision making and service delivery
Clients	<ul style="list-style-type: none"> • National Records & Archives Authority

Projects	<u>Intellect Retail/Card Origination System</u>
Role	Developer
Environment	Java, J2ee, Struts, JavaScript , Oracle Db , WebLogic Server
Description	<p>A system which processes the loan (or Credit Card) application of the customer from data entry to approval stage. Uses Intellect products such as Intellect APS, Intellect BRE, Intellect Workflow, and Intellect Masters</p> <p>APS is a Loans and Cards Application Processing System, which is capable of processing Auto Loan, Mortgage Loan, Consumer Loan, Over Draft and Credit Cards. The processing starts with Essential Data Entry of an application. Based on the input provided the application processes through various queues based on the business policy of the bank. The business rules are validated by a decision making system called Business Rule Engine (BRE). BRE validates the business rules against each and every application in various queues and provides the result to APS. Based on the output the application will be route from one queue to another queue until the final approval of the application. Workflow is responsible for routing the application based on the data provided by APS and BRE. Master stores all the master schemas responsible for proper working of the application.</p>
