

# Rohan

4.5 years of experience

## SUMMARY

---

- 4.5 years of experience in Salesforce.com Development
- Good experience in Lightning Web Components and Salesforce Lightning Design System (SLDS)
- Experience in SFDC development using Apex Classes, Apex triggers, Batch Apex, Schedule Apex, and, Future Method, Queueable Apex, Apex Test Classes, Components, SOQL, and DML Statements
- Experience with Salesforce CRM Sales Cloud as per the project requirement
- Experience in creating integration third party API and knowledge of web services i.e. REST API, HTTP Callouts
- Experience in using various tools like Github, Bitbucket
- Experience in HTTP methods used for interacting with RestResource such as GET, POST, PUT, DELETE, and PATCH
- Experience in unit testing and integration testing
- Experience in Development, Administration, Configuration, Implementation, and Support of Salesforce CRM based on Apex language and leveraging Force.com Platform
- Good understanding of Lightning Framework, Lightning Flow and implementing Lightning Web Components
- Experience in the use of a Data Loader and scheduling timely data backup operations using Apex Scheduler
- Knowledge of retrieving some data and its functionality from Third-Party APIs and displayed within the Lightning Component
- Basic Understanding of Financial Service cloud, and Service Cloud
- Developed various Apex classes, Apex Controllers and Apex Triggers for various functional needs in the application of Lightning Web Components with best practices
- Experience in Data migration using Data Loader

- Experience in creating the Lightning Web Component (LWC) Using @Wire Service, Pub-Sub Communication, Navigation Service
- Solid Understanding of Apex Programming

## EDUCATION

---

- Bachelor of Engineering

## CERTIFICATIONS

---

- Salesforce Certified Platform Developer 1

## CORE SKILLS

---

**Salesforce Technologies:** Sales Cloud, Standard objects, Custom Objects, Workflow & Approvals, Security Model, Apex Classes, ApexTriggers, Apex Test Class SOQL, SOSL, Dashboards, Reports, Lightning Framework, Lightning Web Components, Lightning Base Components

**API:** RestResource

**Tools & Utilities:** Developer Console, Visual Studio Code, Workbench, Data Loader, Github

**CRM:** Sales Cloud

**Languages:** Apex, JavaScript, JSON basics

---

- Good exposure to the Security model in Salesforce
- Administered the Users, Profiles, and Permission sets for each and every role in the organization
- Responsible for Workflow, Process Builder, Custom Objects, Validation Rules, Profiles, and Permission Sets
- Good understanding of Governor limits
- Results-driven individual from Salesforce. To apply skills, knowledge, and efforts to serve, help and benefit organization in particular and mankind in general

## PROJECTS

---

### Project -1(Nov 2022 - April 2023)

**Project Overview** - This project provides quality pre-employment screening, criminal background checks, verifications, and drug testing for

businesses. Customizable search solutions to help thousands of companies, pre-screen potential employees

**Technologies Used** - Sales Cloud, Apex and Visualforce

**Key Responsibilities -**

- Worked on Project Documentation for the Salesforce platform
- Coordinated and managed communications between product managers, and the engineering team
- Migrated Salesforce Workflow Rules & Process Builder to Flow
- Created Rest resource and also integration third party API
- Created Lightning Web Component (LWC) Using @Wire Service, Pub-Sub Communication, Navigation Service

### **Project -2 (Oct 2020 - July 2022)**

**Project Overview** -This Project is about a leading independent oil and natural gas exploration and production company. Operations are focused onshore in the United States. The company's portfolio of oil and gas properties provides stable, environmentally responsible production and a platform for future growth

**Technologies Used** - Lightning Web Components, Data Loader, Apex SLDS, WorkBench, Data Import Wizard, REST API, HTTP Callouts

**Key Responsibilities -**

- Designed Lightning Web Components for UI using Salesforce Lightning Design System as per client requirement
- Developed in Lightning Web Component(LWC ) framework by using decorator, Apex call by Imperatively, Lightning Design Component and Navigation Service
- Design custom objects and Developed Apex classes and Apex triggers for the various functional need of the application
- Worked on Data Security Model to ensure the security and safety of data
- Worked on multiple Triggers for multiple objects to handle different scenarios like some complex validations and field updates
- Worked on Integration with 3rd party systems

- Worked on REST callouts
- Worked on Admin configurations and security model setup

### **Project -3(Feb 2019 - Sept 2020)**

**Project Overview** - This Project is about the largest American multinational telecommunications conglomerate. It is the second-largest broadcasting and cable television company in the world by revenue, the largest pay-TV company, the largest cable TV company, and the largest home Internet service provider in the United States, and the nation's third-largest home telephone service provider

**Technologies Used** - Apex Classes, Sales Cloud, Asynchronous Apex, Triggers, and Test Classes, Validation Rules, Workflows, Process Builder, Approval Process, Sharing Rules

**Key Responsibilities -**

- Role in the project as Salesforce Lightning developer
  - Created Triggers for assigning records to different users based on criteria matching
  - Worked on the Batch jobs and Schedulers
  - Created Process Builders to handle different scenarios
  - Done with Object Configuration and Profile and Permission Set Setup
-
