Work Experience

Senior Associate

Feb 2018 - Current

Publicis Sapient

Project: IQVIA Vigilance Platform (IVP) is a safety platform for managing and enhancing pharmacovigilance (PV) applications. Pharmacovigilance also known as drug safety, is the pharmacological science relating to the collection, detection, assessment, monitoring, and prevention of adverse effects with pharmaceutical products.

Element is the core package for IQVIA Pharmacovigilance. This package is used by other packages to extend their elements and components. Element team is responsible for case management and design case processing forms. It support lightning page with configurable sections, columns, multilanguage support, controllable sections and fields.

Roles & Responsibilities:

Technical:

Designed and developed Query & DML framework which is a centralized point for Database CRUD operations thereby standardising the process across the Platform. Developed Trigger Framework which standardise the trigger usages within the Platform. It implements recursion control for triggers.

Salesforce Components: Lightning framework, Visual force, Apex code, triggers, Batch Apex and Integration using REST API.

Version Control: Github

CI/CD: DEVOPS.

Architectural, Functional & Others:

Coordinating with business for understanding the requirements and stakeholders for dependency management during the Product development phase.

Leading different modules within the Product and mentoring junior resources

Involved in design reviews and code reviewing activities to ensure we follow unified development standards with best practises in the industry along with security guidelines

Writing Architecture, Design Documents and reviewing product documentation.

Project: [Louis Vuitton](#)

Worked on the item page of Louis Vuitton wine portal.

Roles & Responsibilities:

Project: Super9

The HP Super9 supports HP Business Units and Sales to acquire new business by offering an easy way for customers to test HP technology. This is a unique sales tool that allows existing and potential customers to try out HP products and offers customers the possibility to buy their demo unit after having tested it. This process will begin by Generating Loan Request and goes through a series of life cycle like (Loan Submitted for approval, pending approval, pending allocation, build schedule, confirm receipt, open placement, recovery placement, cancel and closure). Once your loan request got approved then products will be automatically got allocated and your products will tracked by loan tracking object. After Successful Completion of your loan period, your loan request will be closed.

Roles & Responsibilities:

- Worked with batch class and schedule them to force closing the Loan Request.
- Triggers to Auto Allocating Products to Loan Request From material Master.
- Custom Visual-Force Pages to bring together different object data.
- Created Work Approval Process to Approve the Loan Requests.
- Designing Reports and Dashboards.
- Customized page layouts for Salesforce standard and custom object.

Software Engineer

June 2013 – Oct 2015

Aspire Software Consultancy

Project : [Almo Personal](#)

Almo is a job portal as well as recruitment solution which helps job seekers to find job and the company to carry on their recruitment process.
