### Objective

A driven software engineer aspiring to make great strides in construction of elegant and efficient programs that makes a difference. Goes to great lengths to achieve perfection in design, architecture, and composition of software. Possesses practical knowledge of working with large codebases and long-term projects.

A generalist, who picks up new languages very quickly, believes that using the right tool for the job at hand is very important.

### Skill Profile

- **Technical Skills:** Javascript, ES6, React js, Redux, React hook, MongoDB, GraphQL, Node Js, ExpressJs, CMS, SEO, Redux Thunk, Redis, ADA Compliance, Git, JSON, Google Analytics, Swifttype search, CDN, SVN, Typescript, Cypress (Frontend Test Cases), GraphQL, Typescript.
- **Languages known:** Node Js, React Js, Javascript and JQuery
- **Database / CMS / Services:** Content Management System (CMS), Mongoddb, Redis, Docker, AWS (EC2,S3). CICD (Github workflow), Work on micro services

### Summary of Experience

- 1) Currently Working in **Emtec**, Pune, **Role:** Senior Software Developer (**Aug 2022 - present**)
- 2) Worked in **Cognizant**, Pune, **Role:** Associate-Project (**May 2021- June 2022**)
- 3) Worked in **Raw Engineering**, Mumbai, **Role:** Application Developer (**Aug 2016 – May 2021**)

### Role & Responsibilities Handled

#### Raw Engineering

Responsible for the planning, design, implementation, organization, and operation for the service section of the company. Played a major role in Application Developers for various services. This included configuring and integrating the website with CMS. Also, I have managed the team and coordinated with clients as well for requirement gathering.

Developed websites names as **sierramonitor.com** and **aylanetworks.com**, **echelon.com**, **pella.com** with English, China and Japan Locale as well as worked on **Roblox** document site as well. In that we have done the following functionality.

- Users Form, Send mail, SEO, Google Analytics, Swift Search, Google Tag Manager, Google Search.
- Used API call to save data.
- Send mail.
- Form Server and client-side validation with captcha

- worked with twitter to fetch latest twist.
- worked with HubSpot (all website forms integrate with HubSpot using APICall)
- Worked with server-side database call and perform some action on it.
- Generate Sitemap.xml file.

## Cognizant

- Technical contributor, focus on building and maintaining a full featured desktop report management application.  
I managed the auto generation of different reports using Cron job scheduler, sending reports via email and handling medical case studies for Novartis (Pharma industry) clients using reactjs and .net code along with SQL database.
- Validating user actions and providing responsive feedback. Facilitating release planning by communicating with business users, product owner, developers and quality testers.

## Emtec

- Involved in designing and implementing robust, reusable microservice based logistic application.
- Utilizing technologies such as React Js functional component with hooks, Node Js, GraphQL, rest api MySQL queries, Cypress test framework.
- Implementing CI/CD pipelines with Github, conducting code quality analysis with SonarQube, overseeing project management in Jira, monitoring application using new relic, log analysis and docker health check using the Kubernetes IDE(Lens), usage of Docker to containerize the application.
- Followed Agile/Scrum methodologies.

## Education

Bachelor of Technology (B.Tech.) | Computer Science  
University of **Dr. Babasaheb Ambedkar Technological University Lonere, Raigad**

## Hobbies

- Sketching
- Technical Reading, watching movies
- Travelling, Exploring new places
