## 3<sup>rd</sup> Party Services I have worked for the projects

- Paypal Payment Gateway Integration
- Stripe Payment Gateway Integration
- Authorize.net Payment Gateway Integration
- MPay Payment Gateway Integration
- Zoho CRM API Integration
- Ebay Selling & MIP API Integration
- Shopify Webhook & API Integration
- OAuth for Twitter, Facebook, LinkedIn, Github, Instagram
- Namecheap Domain Registration API
- OnlineNic Domain Registration API
- Laravel Forge API Integration
- AWS S3/BackBlaze Storage Integration
- Google Analytics API Integration
- Google Firebase API Integration
- WordPress API Integration
- ShipStation API Integration
- CaddyServer API Integration

## Professional Experience

2021.09 – 2022.03

### Senior Full Stack Developer, UPGRADEMEDIA

- Developed NFTs marketplace website using Next.js, Hasura, GraphQL, Serverless
- Built Admin panel and custom Frontend design update.
- Fixed production issues and improved security and performance.

2021.04 – 2021.09

### Project Manager, KALISTA BELLE BEAUTY

- Transition current Shopify website to a custom built website and assign developers to continue the transition.
- Worked closely with other Managers to meet expectations of the site as well as any pending tasks.
- Monitoring the frequent changes in the website to deliver weekly updates in changes to all managers.

2020.12 – 2021.04

### Backend Developer, KALISTA BELLE BEAUTY

- Transitioned Shopify website into a pure custom website using Bagisto, Laravel php and MySQL for Kalista Beauty products
- Redesigned the Bagisto site to match Shopify's site while importing the products through product seeders and categories seeders
- Dynamically created the website so that any pages can be changed through the admin and through the database and through Nav
- Optimized the speed and the performance of our backend operations in GLO to increase the sync between products and inventory

2017.05 – 2020.12

### Full Stack Engineer, TYCENMEDIA

- Designed, built and maintained complete 80+ websites.
- Created landing pages, dashboards and web applications using Laravel, Vue.JS, WordPress and PHP and Javascript programming languages.
- Designed visual and graphic images to use on multiple platforms.
- Established hosting for each website and completed go-live process by uploading sites to host account.
- Directed design, writing and production of page content to fulfill project demands and satisfy customer needs.

- Conducted full life-cycle software development in multiple software environments.
- Coded user-customizable applications to convert raw data from design engine to graphical formats.
- Reviewed information and elements regularly on websites and pages for accuracy and functionality.
- Created and implemented firewalls, encryption strategies and other critical security measures.

#### **-ABAD(Anti-Black Activity Database), 2021.01 – 2021.03, KING FLEX LLC**

This website is built with Laravel & D3.JS. Admin and users can add anti-black activities in the panel and in front page, they are displayed on Map data with various filter option.

#### **-Frame Experts, 2020.06 – 2020.12, KOBBA LTD**

This is frame order website. A customer can order the frames as he wants and see how they look using builder component. Frame builder component was built with Vue.JS and admin & front area are built with Laravel.

#### **-RDY Printing, 2020.01 – 2020.06, RDYMFG LLC**

This is a Ecommerce website to get the custom orders for sticker label printing. It's built with Laravel & Vue.JS.

#### **-Vector Girl, 2019.06 – 2019.12, BIZINABOX LLC**

This website provides a lot of free & premium vectors. Membership management, role based authentication systems. It's built with Laravel.

#### **-Free Logo Maker, 2018.06 – 2019.06, BIZINABOX LLC**

This is a logo maker website. Admin can add logo types (SVG) and the customers can build their logos based on different logo types. It's built with Laravel & Vue.JS.

#### **-Free Vectors, 2018.02 – 2018.06, BIZINABOX LLC**

This website is built with WordPress & Laravel. Frontend is built with the custom WordPress theme and admin/user area is built with Laravel.

#### **-ClayCoffeeCo, 2017.05 – 2018.02, TYCENMEDIA LLC**

This website is built with Shopify & shopify recharge app. The subscription flow is totally customized using workflow & shopify recharge app.

#### **2013.05 – 2017.05**

#### **Senior Web developer, PROMOTION ENGINE**

#### **CMSIgnited**

- Utilized CodeIgniter framework to build custom content management system.
- Created an administration panel to control both the front-end and back-end of the system.
- Integrated open source libraries that enabled module based features.
- Built email templates, files, pages, variables and widgets modules that allowed the management of content throughout the website.
- Developed the navigation and theme modules to allow the control of the design of the front-end.
- For the member management, I built a groups, members and permissions module that allowed not only the authentication of users but manage the areas that those users had access too.
- Redirects and settings made up the tools of the system to allow the control of flow throughout the website.

## Bust-A-Code

- Utilized PHP and MySQL to develop a full freelance website.
- Integrated PayPal API for payment system.
- Created web projects management that allowed the posting, bidding and choosing over developer.
- Built web scripts management that allowed the posting, searching and download of software.
- Designed project posting to match the details to web scripts at the end of the posting. This allowed clients to invite developers that have already created projects similar to theirs. Once invited, the developer can bid less than the set amount, as they can use their script to build the client's project.
- Developed profiles that allowed the management of bids, saved projects, financials, resume, portfolio and my scripts.
- The administration panel allowed the management user's, projects, scripts, categories and any other item part.

## MyToDoList

- Created a todo list management system with PHP and MySQL.
- Built an authentication system that allowed registration, account activation and login.
- Developed the todo system that allowed CRUD operations and the assigning of the todos to other users.
- I also created tabbed categories for the todos. This allowed a user to view theirs, others and closed todos.
- I also utilized ajax to retrieve most of the data and updating.

# Education

2009 – 2013

**BACHELOR OF Computer SCIENCE, SHANGHAI UNIVERSITY**
