

RAGHUNATH DEBASISH SAMANTARAY

Assistant Consultant

Experienced Software Development Engineer in Test (SDET) with a passion for ensuring the quality and reliability of software products. My collaborative approach allows me to effectively work alongside development teams to identify and resolve issues early in the development lifecycle, resulting in improved product quality and faster time to market.

WORK EXPERIENCE

QA Lead - Assistant Consultant

Tata Consultancy Services

Nov 2014 - Present

- Designed, developed, and executed automation scripts using appropriate tools, such as Selenium and Cucumber.
- Worked on cross-browser testing like Mozilla Firefox, Google Chrome, and Safari using WebDriver
- Familiar with the execution of test cases in parallel in remote systems using a selenium grid
- Experience in Page Object Model, Singleton Design Pattern, Factory Design Pattern & data-driven testing using the Apache POI library
- Experience in handling multiple windows, alert pop-ups, frames & broken links
- Experience in using selenium locators (XPath, id, name, tag name, link text, partial link text, and CSS)
- Involved in scrum meetings, sprint planning every two weeks, and set up daily stand-up meetings to monitor the status
- Involved in API testing using Postman
- Conducted technical training at the company level, mentoring new joiners
- Interacted with developers and product owners to analyse business requirements and functional specifications of the project
- Worked closely with managers and stakeholders to ensure quality metrics were reviewed, closed, and agreed upon.
- Played a key role in the end-to-end testing process in delivering the application using waterfall and agile methodology
- Contributed to test case design, requirement mapping, execution, and optimization including Bug reporting
- Participated in quality assurance meetings to discuss current projects and developments
- Reviewed and studied customer feedback to implement changes and modifications in products
