From	To	Duration	COMPANY Name	Role/Designation	Domain
Aug 2022	Feb 2024	1 Year 6 Months	WinWire Technologies Private Limited	Senior Software Design Engineer - Test	Retail & Digital
Oct 2018	Aug 2022	3 Year 9 Months	IPark Info Technologies Private Limited	QA Engineer	Entertainment
Nov 2016	Oct 2018	1 Year 11 Months	Vume Interactive Networks	QA Analyst	Finance & Portfolio

QUALIFICATION:

Completed Post-Graduate Programme in Planning & Entrepreneurship from The Indian Institute of Planning & Management, New Delhi.

TECHNICAL SKILLS:

Operating Systems	Win XP, Win 07,10 and Win 11.
Languages	Core Java
Automation Tools	Selenium Web Driver
Other Tools	GIT, Maven, Cucumber, IntelliJ, Eclipse, Jenkins, Adobe Job Builder
Defect Management tools	JIRA
Domain	Retail -Digital, Entertainment, Finance & Portfolio Domains
Database	SQL Server
Microsoft Office	All tools including One-Note.

Professional Experience:

Company Name: WinWire Technologies Private Limited

Project Name	MDPD (Marketing Data & Personalized Datasets), CXIA (Customer Experience & Insight Analysis) , HBHL (High beam Headlights)	
Client Name	Adobe	
Technology	Java, Selenium, BDD Cucumber Framework, GIT, Jenkins, Jira, Maven, DB tools, Eclipse, IntelliJ	
Role	Senior Software Design Engineer - Test	Team Size: 16

1. **MDPD (Marketing Data & Personalized Datasets)**

Description: MDPD within Adobe is integral to marketing data processing and analysis. Functional and automation testing in this context helps maintain data accuracy, system reliability, and overall module performance, ensuring that it continues to support business objectives effectively and securely.

2. **CXIA (Customer Experience & Insight Analysis)**

Description: Adobe's CXIA (Customer Experience & Insight Analysis) project is a dynamic and critical initiative aimed at enhancing customer experiences and gaining valuable insights through data analysis. As part of this project, I served as a key member of the testing team, contributing to its success by ensuring the reliability, functionality, and performance of the CXIA platform.

3. **HBHL (High beam Headlights)**

Description: HBHL project underscores my expertise in testing specialized automotive features, my ability to work effectively with cross-functional teams, and my commitment to delivering innovative, safe, and high-performance automotive solutions.

Company Name: IPark Info Technologies Private Limited

Project Name	Integrated Indian Movie Database	
Client Name	ModeFinServer	
Technology	Java, Selenium, BDD Cucumber framework, GIT, Jenkins, Jira, Maven, DB tools, Eclipse, IntelliJ	
Role	QA Engineer	Team Size: 8

4. **Integrated Indian Movie Database (IIMD)**

Description:

IIMD is a web application developed as a handy one-stop destination for users who are interested to see the cast & crew, reviews, ratings, trailers, news updates, galleries, release dates, links to stream/rent the movie online & box-office collections of movies. There are various websites and portals with rich amount of the data, but the user must access multiple sources to view all the data. So, IIMD is being developed with the intention of developing a one-stop destination for the user to view all the data of movies without any lingual barrier.

QA ENGINEER

Company Name: Vume Interactive Networks

Project Name	Cornerstone	
Client Name	OpenStack	
Technology	Functional testing, Jira, Agile process	
Role	QA Analyst	Team Size: 9

5. **Cornerstone**

Description:

Cornerstone is a web-based, easy-to-use batching utility that lets you access vast quantities of data directly from data libraries. Cornerstone provides the tools you need to specify the sources of data and the layout of the resulting datasets. You can then File Transfer Protocol (FTP) this data, at a time and date you specify, directly to your workstation or file server for further processing. This FTP process can either be initiated by you to Client or by Client to you.

Roles and Responsibilities:

- Analyzing the requirements.
- Involved in UI Automation using Selenium with Java.
- Hands on experience with BDD cucumber Framework
- Involvement in Sprint Planning meetings, Backlog meetings and Retrospective meetings.
- Preparing the test plan.
- Understanding the functionality of the application through User stories.
- Involvement in preparation of Test Scenarios and Test Cases to develop automation script.
- Testing the Technical Features and User stories with functional and automation testing both.
- Report defects in JIRA and retesting the defects which were reported.
- Having trouble shooting calls with the Preprod support team to recreate the environmental defects.
- Performed testing in both SIT (Lower environment) and VALIDATION (Higher environment).
- Maintaining the code version repository by using GIT.
- Created Test Cases Using Element locators and Selenium WebDriver methods.
- Updated Regression Test Cases whenever changes are done to the application.
- Executed automation test cases on Chrome browser.
- Having potential in Debugging the Scripts, Execution, Analyze and Evaluate the automation Scripts.
- Maintaining the quality check points to make sure the best quality is delivered on every aspect of execution activity.
- Day to day communication with team members for requirement discussion, defect discussion or impediments if any.
- Co-operating with different teams in order to resolve defects.
