Professional Experience (In Reverse Chronological Sequence)

Project Name	Agilysys Sales & Catering
Project Duration	March/2020 to Present.
Role/Title & Work Location	Quality Analyst & Chennai, IN
My Role in Project	Performed Manual & API Testing. Using Postman tool performed API testing by sending the JSON response to the microservice. Validated the status codes returned by the micro-service. Performed functional testing for the features and creating QA summary report for the QA sign-off.

Project Name	Agilysys Golf
Project Duration	September/2019 to March/2020.
Role/Title & Work Location	Quality Analyst & Chennai, IN
My Role in Project	Performed Manual Testing. Attended grooming sessions provided by BA and write test cases based on queries clarified and executed the test cases for the same. Raised bugs whenever there is a requirement gap in between the Requirement and the Application. Performed retesting for the resolved bugs and performed the necessary actions Reopen/Close as per the bug status. Shared the weekly summary report for the list of bugs raised in the project to the Manager.

Project Name	ESS Rollout
Project Duration	Nov/2016 to September/2019
Role/Title & Work Location	Software Engineer & Chennai, IN
My Role in Project	Performed Manual Testing. Learned how to analyze the requirements by using boundary value analysis, how to write TC's for the requirement, how to achieve 100% requirement coverage, how to raise bug.

Responsibilities:

➢ Attending Grooming sessions provided by BA and raise queries based on Feature/User Story and prepare test cases.

➢ Understanding the Client Requirements, design, functionality, change request and enhancements of the system by reviewing the BRS, Functional Specification document and Use Case.

➢ Experience in Preparation of Test Scenarios, Test Cases, Testing Checklist and Traceability Matrix based on client requirements as well as design changes.

➢ Conducting System/ Regression testing for the software product and analyzing the behavior of the system under various environments.

➢ Experience in Identifying, Reporting, Analyzing and Tracking the Defects using defect tracking tools like HP ALM & TFS.
