WORK EXPERIENCE

TPI COMPOSITES India Pvt, Ltd
Specialist, IT Applications
May 2022 - Present Chennai

- **EDI Automotive Project: Jitterbit Tool**
  - Collaborated with multiple teams including Oracle technical team, Functional team, business stakeholders, clients, and external teams to ensure successful project delivery.
  - Played a key role as the primary developer internally for integrating EDI transactions into Oracle using Jitterbit as a middleware, being the sole internal developer for this task.
  - Took ownership of the development of the "EDI 862 transaction" from start to end as an individual contributor.
  - Demonstrated adaptability and perseverance by quickly learning and developing the "862 (Shipping Schedule) EDI" despite sudden changes in requirements and tight deadlines.
- **PLM Integration Projects: Jitterbit Tool**
  - Orchestrated integration of PLM items into Oracle database using Jitterbit, ensuring seamless data synchronization and integrity.
  - Implemented integration solutions for PLM BOM to Oracle DB utilizing APIs, enhancing data accessibility and accuracy.
- **AWS Cloud Solutions Architect: AWS Services**
  - Architected scalable and efficient cloud solutions in AWS.
  - Developed a solution using AWS services such as Lambda, S3, Event Bridge, and AWS Trusted Advisor for monitoring performance and cost optimization.
- **Microsoft Syntex and Power Automate Workflow Project:**
  - Utilized Microsoft Syntex and Power Automate Workflow to automate metrics for contracts and send mail alerts for document expiration, recognized by leadership for efficiency and use case.
- **Enhancement Projects and Bug Fixes:**
  - Actively contributed to process improvements, including creating comprehensive runbooks for various projects and implementing effective solutions for technical challenges.

  - Involved in enhancement projects and bug fixes on projects in the backend using JavaScript.

EDUCATION

B. Tech CSE- 2018 to 2022
CGPA 72%, First Class

CERTIFICATIONS

- Jitterbit Certified Developer
- Certified Scrum Master
- Microsoft SharePoint Syntex for AI Document Management
- Agile Project Management with Jira Cloud: 1 Projects, Boards, and Issues By: Atlassian University

CORE COMPETENCIES

- Ownership— Took ownership of processes, identifying areas for improvement and implementing effective solutions

- Problem-solving— have working knowledge in applying a structured problem-solving methodology to tackle intricate issues.

- Communication— Expert in using visual aids and graphics to enhance communication and improve under-standing of complex information.

- Writing— have demonstrated the ability to gather information from subject matter experts and effectively document technical processes, procedures, or systems.

- Presentation— Presented projects to leadership team, effectively communicating, and answering queries clearly, resulting in appreciation and good feedback. Conducted IT learning series, presenting about Syntex AI to 90+ associates online, collaborating effectively with cross-functional teams and stakeholders.
