## PROFESSIONAL SUMMARY

My name is Chaitanya Chelikam, I'm expert in Front end and Back end in Angular and Nodejs, Api's. Motivated with 5.11 years of experience in development and design. Dedicated and hardworking with internal drive to deliver my best.

## EXPERIENCE

**03/2022 to Current**

**Senior Software Engineer**  
**Ust Global - Equifax Clint(Ptec)**  
**Responsibilities:**

Migrated Angular JS to Angular 13  
Performed regression and performance tests for updated systems.  
Utilized various software to handle debugging and automation scripting tasks.  
Drafted design objectives and system design documents.  
Documented technical specifications and project testing methods for future reference.  
Delivered code to meet functional or technical specifications.  
Collaborated to define, design and estimate time and resources for development initiatives.  
Designed front-end and back-end solutions for test-driven development.  
Modified company web applications and processes to increase productivity.  
Developed and launched new offerings to optimize customer satisfaction.

**Project1: IWN & Eport**  
**Responsibilities:**

Migrated Angular 8 to Angular 13  
Initiated efforts to migrate legacy applications to [Software] platform.  
Produced proof-of-concept documentation and prototypes for demonstration and evaluation.  
Performed estimates of work hours and tracked progress using Agile and Scrum methodology.  
Wrote clean and dynamic code, leveraging expertise across multiple programming languages to meet diverse requirements.  
Partnered with engineering team to check and optimize interfaces between hardware and software applications. Contributed to sprint planning, prioritising backlogs to meet new demands.

**Senior Software Engineer**  
**Ust Global -(Dell Clint)**  
**Project: INASS & Supply Net**  
**Responsibilities:**

Performed root cause analysis of problems, documented faults in tracking system and generated daily reports.  
Introduced automation tools to enhance workflow.  
Formed dynamic team of software engineers to address critical issues affecting production.  
Implemented responsive web design and mobile friendly design using angular.  
Designed UI screens using html5,css3 and java script and angular.  
Rest API using angular render the JSON data on UI screen in table format.  
Implemented form validations and user collecting data

**Senior UI Developer**  
**Onpassive**  
**UI DEVELOPER**

**Project: On passive connect me-chat video & audio web application**  
**Responsibilities:**

Designed UI screens using HTML5, CSS3, and JavaScript. Used Bootstrap

and Angular UI to make the application user-friendly in the development of the Navigation Bar, Tables, Sliders, Calendars etc. Implemented a Single Page Web Applications (SPA) based front end for displaying user requests, user records history and security settings various users using JavaScript and Angular. Involved Storing and retrieving data from Column OrientedData Base MongoDB. Implemented responsive web design and mobile friendly design using Angular. Created forms to collect and validate data from the user using Angular, jQuery and JavaScript. Used bootstrap tables and grids for displaying data on the UI. Incorporated jQuery UI widgets such as select menu,accordion and date picker on plans selection page to deliver a more interactive user experience. Application backend implemented using node.js application server. Performed Restful routing using node.js which submits my form data to the mongoDb database. Used GIT for Version Control. Web Service using Angular and AJAX and render the JSONdata on UI.

### **UI Developer**

#### **Assert Tech Solutions**

**Project:** TFC Client Implemented a Single Page Web Applications (SPA) basedfront end for displaying user requests, user records history and security settings various users usingJavaScript and Angular. Involved Storing and retrieving data from Column OrientedData Base MongoDB. Implemented responsive web design and mobile friendlydesign using Angular. Created forms to collect and validate data from the userusing Angular, jQuery and JavaScript. Used bootstrap tables and grids for displaying data on the UI. Incorporated jQuery UI widgets such as select menu,accordion and date picker on plans selection page to deliver a more interactive user experience. Application backend implemented using node.js applicationserver. Performed Restful routing using node.js which submits myform data to the mongoDb database. Used GIT for Version Control. Web Service using Angular and AJAX and render the JSON data on UI. **Content:** TFC is a YouTube kind of application. This Website can conduct a Contest for a category. User can come and upload his video to a Contest. If user video wins the contest he may get the prize (Money or Points). User video should follow some rules and conditions then only Prize will give. If the prize is in the form of Money it will Credit into user account, If it is in points he could buy the products from merchandise. The following are the modules in this application.

**Responsibilities:** Analyzing the Business Requirements and Functional requirement documents to understand the application. Involved in Creating new pages fleets,fleet types, profile etc. Involving writing Unit Test cases for all component and service layers. Involving writing test cases for all controllers, services and dao structures in server. Ensure availability of document/code for review

## **CORE QUALIFICATIONS**

HTML5,Bootstrap, css,  
javascript,Database  
My SQL, MongoDB  
Expressjs, NodeJS  
Angular2,4,6,7,8,10,13,Bootstrap  
Visual studio, Notepad++,Sublime  
text  
Analytical Thinking and Problem  
Solving

## **EDUCATION**

**Bachelor of Technology(Electonics & CommunicationE  
SIDDARTHA INSTITUTE OF ENGINEERING & TECHNOLOGY**
