PROJECTS:

1.PROJECT NAME: Hospital Management System

DURATION: 4 months

DESCRIPTION:

The Hospital Management System is designed for any hospital to replace their existing manual paper based system. The new system is to control the information of patients, Room allotment, check doctor availability, Lab Reports and Tests management and total billing. These services are to be provided in an efficient, cost effective manner, with the goal of reducing the time and resources currently required for such tasks. In this system everything is stored electronically so very less amount of paperwork is required and information can be retrieved very easily. It helps the staff to manage outpatients, inpatients, billings, database of patients and the hospital information including the availability of the doctors, their specialization and the whole billing process to various members of the staff.

ROLES AND RESPONSIBILITIES:

- Worked on drawing and analyzing ER Diagrams for the project.
- Involved in creating the custom objects, tabs, fields, formulas.
- Implemented Workflow rules and process builder process.

- Worked on Apex triggers.
- Created Visualforce Pages to suit the needs of theapplication.
- Worked on test classes.

2. PROJECT NAME: Project Management System

DURATION: 6 months

DESCRIPTION:

Project Management System is a salesforce application which helps a manager or a lead to assign tasks to their team and team to collaborate with each other in various tasks assigned for a particular project. Based on type of issue they are divided into 4 - Task, Bug, Epic, Story. We have different sprints with a limited time period to complete the issues in that particular sprint. If an issue is deleted from a sprint, it will be added to backlogs. We have different tabs like - 1) Issues and filters 2) Active Sprints (Show sprints which are in active and their status) 3) Dashboards 4) Projects 5) Settings. The notifications tab helps us to track the status of our issues, releases tab with versions of each project.

ROLES AND RESPONSIBILITIES:
- Involved in requirement analysis and development.
- Worked on lightning cards,datatables,parent and child component communications.
- Created different workflow rules and Approvals for various user processes.
- Worked on aura enabled methods using Soql and Sosl queries.
- Worked on drawing and analyzing ER Diagrams for project.
- Involved in creating the custom objects, tabs, fields, formulas.
- Worked on Apex classes.
- Worked on jscontroller, markup component and helper classes
- Created aura components to display the UI and navigating to another component using pagereference
