## EDUCATION

Kalinga Institute of Industrial Technology

Jul 2017 - Jul 2021

## EXPERIENCE

Oracle Financial Solutions Software - Bengaluru, India

Nov 2022 - present

Associate Consultant (Nov 2022 - present)

- Analyzed problem statements and requirements, resulting in a 24% improvement in business processes through the implementation of data-driven strategies
- Prioritized customer satisfaction, compliance, and ethical practices to maintain security measures.
- Managed software cycles using Agile and Waterfall methodologies, guaranteeing the development of robust applications and secure APIs.
- Established efficient development processes by implementing continuous integration/continuous deployment (CI/CD) pipelines.
- Spearheaded the utilization of Docker and Kubernetes to construct a high-performance architecture for seamless deployment and scalability.

Highradius Technologies - Bhubaneswar, India

Mar 2021 - Nov 2022

Associate Developer (Jul 2021 - Nov 2022)

- Spearheaded front-end and back-end coding initiatives, guaranteeing a robust and user-friendly UI with React.
- Collaborated with a team on developing ReactJS interfaces for a user base of 600, fostering agile teamwork and streamlining project delivery.
- Implemented CI/CD practices to accelerate development processes, placing high importance on security measures and customer contentment.
- Played a key role in HR automation and software projects, highlighting the significance of ethical practices, industry standards, and ongoing enhancements.

Engineering Intern (Mar 2021 - Jul 2021)

- Gained hands-on experience in the software development lifecycle, developing complex algorithms.
- Designed and improved software features using React, prioritizing security and user privacy.
- Engaged in Agile methodologies, promoting teamwork and ethical project execution.
- Assisted in defect resolution, ensuring the delivery of robust, error-free software.

Freelance - Remote, India

Mar 2018 - Mar 2021

Full Stack Developer

- Implemented robust security and networking protocols to safeguard customer data integrity for a dynamic real estate startup
- Developed an intuitive web application utilizing React and Azure, resulting in a seamless user interface experience with cloud computing capabilities
- Embraced cutting-edge technologies like CI/CD pipelines, Docker, and Kubernetes to streamline development and deployment processes efficiently

## ACADEMIC PROJECTS

Customised Sign Language Translator

May/2021

- Developed a Real-Time Sign Language Translator using a tech stack comprising Python, Pandas, TensorFlow, and OpenCV.
- Integrated JavaScript for seamless user interaction. Prioritized security protocols to ensure the privacy and integrity of sensitive information.

## ADDITIONAL

- Certifications: Google Project Management
- Technical Skills: Java, Spring, Hibernate, JavaScript, React, NodeJS, Git, Jenkins, Docker, GraphQL, MongoDB, SQL, My-SQL, PostGreSQL J2EE, Kafka, Selenium, Postman, GCP, azure
- Language Skills: English (Business Professional), Hindi (Native)
