## OBJECTIVE

---

Versatile software engineer with 4+ years of experience, who works well both as part of a team and independently. Seeking to secure an engineering role to tackle problems and work towards the solution. Dedicated and experienced in achieving tangible results with smooth cross-team collaborations with excellent interpersonal communication skills.

## SKILLS

---

<b>Technical Skills</b>	ReactJs, JavaScript, ES6, ECMA, TypeScript, Redux, HTML, CSS, Tailwind-CSS, AstroJS, Astro-Starlight, Material UI, Bootstrap, JSX, Figma, Flowbite, NodeJS, NestJs, Keycloak, RESTful APIs, Jest, Supabase, BlockChain, Self-Sovereign Identity, AWS, WebSockets, etc
<b>Soft Skills</b>	Problem Solving, Communication, Teamwork, Time Management, Continuous Learning, Highly Organized, Multi Tasking, etc
<b>Other Skills</b>	Responsive Web Applications, Performance Optimization, Technical Design Documents, Unit Testing, Webpack, Babel, Cross Browser Compatible Systems, Visual Studio, Media Queries, Authorization and Authentication, Agile Methodology, Code Review, etc

## EXPERIENCE

---

<b>Software Engineer</b> AyanWorks Technology Solutions	July 2023 - March 2024 <i>Pune</i>
<b>Software Engineer</b> Pratiti Technologies	Aug 2022 - May 2023 <i>Pune</i>
<b>Web Developer</b> Primal Infosys	June 2020 - Aug 2022 <i>Pune</i>

## PROJECTS

---

**Credebl.id.** An Identity Provider Web Application is the integration of BlockChain and technologies to provide a customized, end-to-end, identity solution. It is an SSI BlockChain based Open-source self-sovereign identity (SSI) platform to build robust, privacy-enhancing identity digital credential solutions. Developed with React, Redux, NestJS, and deploying over AWS (ECS) infra. ([Try it here](#))

**Enviornmet:** React JS, Astro JS, NextJS, Supabase, Git, and KeyClock

**Credebl.docs** An Identity Provider Web Application is the integration of BlockChain and technologies to provide a customized, end-to-end, identity solution. It is an SSI BlockChain-based Open-source self-sovereign identity (SSI) platform to build robust, privacy-enhancing identity digital credential solutions. This Project provides user end-to-end information for local setup and installation along with all the dependencies and requirements. ([Try it here](#))

**Enviornmet:** React JS, Astro JS, Astro-Starlight, Javascript, Git, and NextJS

**Active Workspace** The Showcase helps you to create an innovative app interface that provides a streamlined and intuitive user experience. It provides product-specific UX references and guidelines and an extensive collection of rich UI elements that are guaranteed to be always aligned with the latest UX principles. It explains the features and usage of UI elements through interactive examples, code snippets, and API documentation. Test cases are written using testing framework jest. Reports of test cases run with the ci-cd pipeline of Jenkins on a daily basic.

**Enviornmet:** React JS, JavaScript, GitLab and NodeJs

**Wenger Musical App** It's a web app for all the musician's community to connect virtually using their own devices. This app helps all the future musician's over the world to learn from experts. It is the best learning and teaching app anyone can use remotely.

**Enviornmet:** : ReactJs, JavaScript, Redux, Jira and Java, SpringBoot.

**Wings Tutor** An Education Application Platform is the integration of learning management systems and technologies to provide a customized, end-to-end, education solution. It will provide time-to-time progress of students and class updates. Also, provide all required data to the class for their development according to overall requirements. An Education app helps students to analyze what they have been taught and students can know the updates of all things like checking the syllabus, test dates, timing of a class, etc. The institute can have all the records so that nothing can be missed out from the syllabus. This overall process helps the students to learn practically and not theoretically.

**Enviornmet:** React JS, Javascript, TypeScript, GitHub and NodeJs, MongoDB

## CERTIFICATIONS

---

- ReactJs Essential
- ReactJs Complete
- Namaste ReactJs

## OPEN-SOURCE CONTRIBUTIONS

---

- Contributed to an open-source blockchain-based SSI (Self-Sovereign Identity) solution.

## EDUCATION

---

- Dr. Babasaheb Ambedkar Technological University
- BTech - 7.1 CGPA
- XII (HSC) - 74/100
- X (SSC) - 88/100
