Marketing Design Intern

Nov.
2019

Sodexo

Tulane University Dining Services

August
2020

Skills + Capabilities

Illustrator, Photoshop, and InDesign

Invision

Adobe XD

RStudio and SPSS Statistics

Blender

Other Skills:

QGIS, Excel (Microsoft Certified), Social Media
Marketing, Recruiting, Spanish Writing

Hanson's Design Philosophy

1 min. Read

I create immersive designs and structures while applying aspects of visual and cognitive psychology to maximize user learning and understanding.

As a result, successful usage and learning is achieved, and the user experience is greatly improved.

Data-Based Approach

Design is commonly seen as an art, but there is an objective way to assess the success of design: through statistical analysis. Through my experiences working in a lab and taking higher-level statistics courses built for psychology research, I can identify variables and analyze valuable data from users to improve UX. I seek to further study the relationship between visual software design, learning, and satisfaction.
