CPQ Solutions Private Limited   May 2015 – January 2017
Developer

Project #1: Core Logic
Project Description: Developed the project from scratch, involved in design sessions, and developed the Config, commerce, DocEngine. This project is fully integrated with CRMOD (Siebel). The sales Rep Can Create the Quotes from CRM, for this we modified a custom object in CRM (Siebel) and linked with Big machines. In this project we completely handled the Pricing with formulas, challenged part in this project is DocuSign, for the DocuSign sending an attachment from big machines to CRMOD without having predefined 'export attachment' integration and made it flexible to use by client.
Roles & Responsibilities:
- Developed the Configuration using Rules, Commerce and DocEngine as per the client requirements.
- Developed the some of the documents using the Document Designer.
- As per client requirements and solution document developing the project dynamically through CPQ

Model.
- Developing Web Service calls using SOAP services.
- Developed the various integrations as per the requirements by considering the related custom objects in CRMOD (Siebel).
- Modified the custom object in CRMOD (Siebel), connected the custom object to big machines through a link which is generated by the 'WEB link generator'.
- Done the Manual test for all use cases at the time of development and also in UAT.
- Involved in Client meetings, interact with them and gathered requirements.

Environment: BML, BMQL, CSS, XML, XSL.

Project #2: Taxware
Roles & Responsibilities:
- It is a Maintenance Project. Involved in Bugs Fixing.
- Developed and modified some of the documents in the Doc Engine

Environment: BML, BMQL, CSS, XML, XSL

Project #3: Synopsis
Roles & Responsibilities:
- Developed the project from scratch, involved in design sessions, and developed the Configuration, commerce.
- As per client requirements and solution document developing the project dynamically through CPQ Model.

Environment: BML, BMQL, CSS, XML, XSL
